Dear Sir/Madam

As a young family moving into the Georges Fair Community in the middle of 2013 we would like to raise our concerns over the proposed Material Recycling Facility in Moorebank. In particular the potential environmental factors the facility would impact on the area including an increase in air and noise pollution and an increase in heavy traffic congestion.

We bought land at Georges Fair with the expectation that this would be a good investment in our families future, with a young child it is important to us that we provide her with the best quality of life and a healthy environment to grow up in. The decision on the location was based on these factors, along with affordability and proximity to work.

We are also concerned that this development would potentially lower the property values in the area and make it a less attractive location to live.

We appreciate the opportunity to provide feedback on the proposed recycling facility
