OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

637

1. I **oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I **oppose the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. I **oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

643

1. I **oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I **oppose the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. I **oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

FULL NAME:	ADDRESS:	DATE:
Daniel Fitzgerald	23 Christiansen Blvd, Moorebank	4/5/13

648

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

Oppose the proposed Moorebank Waste Processing Project Project Number MP 08_0187 at Lot 5 DP 1087574 Newbridge Road Moorebank

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

656

1. I **oppose** **the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I **oppose** **the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. I **oppose** **the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose** **the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose** **the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose** **the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose** **the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose** **the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose** **the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

Frank & Gordana Brbot

4 Hoy St, Moorebank NSW 2170

Date: 3rd April 2013

NSW Department of Planning

GPO Box 39,

Sydney NSW 2001

Dear Sir/Madam,

I am writing this letter to **oppose** the proposed Moorebank Waste Processing Project (05_0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

1. I **oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. I oppose the building waste processing plant because of the risks from asbestos and toxins.
At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*).
There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*).
This is an unacceptable health risk for local residents.

3. I **oppose the building waste processing plant** because of the potential for flooding.
The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. I **oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*).
The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. I **oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant.

In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. I **oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*).
Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.

7. I **oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. I **oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. I **oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

We are a new community that want a safe and lovely environment to live in with our children.

Sincerely,

Gordana Brbot
Georges Fair Resident

Frank Brbot

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

659

1. I **oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks. Georges fair has beautiful parks and surrounding paths for walking and cycling. An increase in trucks will put the health and safety of our families at risk, increase dust exposure and increased risk of children been hit by a truck.
2. I **oppose the building waste processing plant** because of the risks from asbestos and toxins. The recycled material may include glass, fibre cement, clay, sandstone, asbestos and who knows what are building material. This dust will blow right across the Georges Fair estate, exposing all the residents of Georges Fair to this concrete dust and exposing us to a variety of respiratory illnesses. Concrete dust is very fine and impossible to get out of the lungs once inhaled. Studies have shown that inhaling small doses of concrete dust can decrease lung function. Moorebank recyclers will be exposing all residents to a variety of respiratory illnesses. It is exposing children to an increase risk of Asthma and of course all resident are at increased risk of chronic bronchitis, emphysema, acute silicosis, silicosis, lung cancer, kidney damage and scleroderma. The literature also states that it is wrong to assume that water spray can eliminate respirable dust. Visible dust can travel up to 1km while the thinier and lighter dust can travel longer distances. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. I **oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina. We should be creating an area that been talk about because of the great things, such as the marina, lunches by the water. The dust hills are a health hazard and eye sore.
6. I **oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial

roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. With the opening of Brickmakers Dr there is already an increase in noise pollution and congestion with trucks with trailers going up and down the road and this is 7days a week. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.

7. **I <u>oppose</u> the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated. To approve this application would devalue and destroy the livelihood of all the resident of Georges Fair, No one will want to live where themselves, their families and children are at risk of a variety of respiratory and skin conditions, and where they can't go out in there own backyards or parks due to the noise and pollution that we will be exposed to.
8. **I <u>oppose</u> the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. **I <u>oppose</u> the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.
10. **I <u>oppose</u> the building waste processing plant** as it is not providing employment opportunities and the building of the Marina will promote employment and development of local businesses. This recycling facility will destroy the local area and its health of its residents.

The health risks alone should be enough to **<u>NOT</u>** approve this application, no recycling plant should be put near a residential area, especially when there is plenty of land that could be used away from where people are living.

As a local community member, I **<u>OPPOSE</u>** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **<u>REJECT</u>** this proposal.

Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose** **the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose** **the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose** **the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose** **the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

FULL NAME:	SIGNATURE:	ADDRESS:	DATE:
GEORGE CHRYSANTHACOPOULOS		3 THOMPSON AVE MOOREBANK NSW 2170	26/03/2012

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

662

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. **I oppose the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I oppose the proposed Moorebank Waste Processing Project (Project Number 05_0157) at Lot 5 DP 1065574, Newbridge Road, Moorebank.

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

(667)

1. I **oppose** **the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I **oppose** **the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. I **oppose** **the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose** **the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose** **the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose** **the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose** **the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose** **the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose** **the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

68

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. **I oppose the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. **I oppose the building waste processing plant** because of increased traffic. FULL NAME:	SIGNATURE:	ADDRESS:	DATE:
IGNACIO B. GIMENEZ		42 Schulten Street, (Georges Fair), Moorebank 2170	20 /03/2013

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

671

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks. Georges fair has beautiful parks and surrounding paths for walking and cycling. An increase in trucks will put the health and safety of our families at risk, increase dust exposure and increased risk of children been hit by a truck.
2. **I oppose the building waste processing plant** because of the risks from asbestos and toxins. The recycled material may include glass, fibre cement, clay, sandstone, asbestos and who knows what are building material. This dust will blow right across the Georges Fair estate, exposing all the residents of Georges Fair to this concrete dust and exposing us to a variety of respiratory illnesses. Concrete dust is very fine and impossible to get out of the lungs once inhaled. Studies have shown that inhaling small doses of concrete dust can decrease lung function. Moorebank recyclers will be exposing all residents to a variety of respiratory illnesses. It is exposing children to an increase risk of Asthma and of course all resident are at increased risk of chronic bronchitis, emphysema, acute silicosis, silicosis, lung cancer, kidney damage and scleroderma. The literature also states that it is wrong to assume that water spray can eliminate respirable dust. Visible dust can travel up to 1km while the thinier and lighter dust can travel longer distances. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina. We should be creating an area that been talk about because of the great things, such as the marina, lunches by the water. The dust hills are a health hazard and eye sore.
6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). 324 extra trucks on this road is to many for a road that was

only meant to be for cars and 50km zone, This is what they state now, but I'm sure they will try and expand there business and with this the amount of trucks will increase. Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. Moorebank recyclers Pty Ltd have stated that there is only 6,500 vehicles on Brickmakers Dr per day and 5-6% are trucks, I am up at 6am every morning and the trucks are continually going up and down Brickmakers Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. With the opening of Brickmakers Dr there is already an increase in noise pollution and congestion with trucks with trailers going up and down the road and this is 7days a week. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated. To approve this application would devalue and destroy the livelihood of all the resident of Georges Fair, No one will want to live where themselves, their families and children are at risk of a variety of respiratory and skin conditions, and where they can't go out in there own backyards or parks due to the noise and pollution that we will be exposed to.
8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.
10. **I oppose the building waste processing plant** as it is not providing employment opportunities and the building of the Marina will promote employment and development of local businesses. This recycling facility will destroy the local area and its health of its residents.
11. **I oppose the building waste processing plant** as the proposed operating hours will impact on the Georges fair resident, we will essentially only get one day of peace, they state they will cease at 6.00pm but again when they can make an extra dollar who is going to stop them working until 8pm, or that extra truck that gets stuck in traffic or decides to get an early start.

There is no good outcomes for local residents, the health risks alone should be enough to **NOT** approve this application, no recycling plant should be put near a residential area, especially when there is plenty of land that could be used away from where people are living.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

FULL NAME:	SIGNATURE:	ADDRESS:	DATE:

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

673

1. I **oppose** **the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I **oppose** **the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. I **oppose** **the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose** **the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose** **the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose** **the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose** **the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose** **the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose** **the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I oppose the proposed Moorebank Waste Processing Project Project Number [illegible]

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DI 1065574, Newbridge Road, Moorebank.

679

1. I **oppose the building waste processing plant** because the proposed development is far too close to existin and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housin estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cu through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I **oppose the building waste processing plant** because of the risks from asbestos and toxins. At the communit consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused t comment on whether asbestos would be processed at the facility and whether toxins would be released. There i a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cance Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (' *Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). Th developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in th development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for loc residents.
3. I **oppose the building waste processing plant** because of the potential for flooding. The proposed developme is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause a environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose the building waste processing plant** because the NSW Government has indicated there will be ' return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011* The local community is opposed to this development. Councillors of the Liverpool City Council have vote unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose the building waste processing plant** because the proposed development is incompatible with th current and planned residential and recreational uses of the area. The proposed concrete processing facility just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young familie The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a libra and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedi Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no long suitable for a building waste processing plant and have started to shut down *their* operations to create their ov housing estate and marina.
6. I **oppose the building waste processing plant** because of increased traffic. The developer states the propose facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arteri road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic w have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquar Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cau an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, furth impacting on already high congestion. The residents of Moorebank and other areas should not experience a additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose the building waste processing plant** because of the negative impact on land values. Residents of th Moorebank precinct in particular have spent significant amounts of money on land and homes. The propose development will have a severe impact on land values and residents will not be compensated.
8. I **oppose the building waste processing plant** because there was a lack of community consultation at a meeti held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of loc residents and future residents about the meeting. The organisers refused to answer questions from local reside on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose the building waste processing plant** because it is dangerous to residents for a concrete processi plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to bu another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to ea other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillor the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NS Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

~~Subject: The proposed Moorebank Waste Processing Project (Project Number 06_0182), at Lot 6 DP 1088574, Newbridge Road, Moorebank~~

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. Objection to the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP

From: "Kumaravel Arcot" <karcot@gmail.com>

To: <brent@concreterecyclers.com.au>

Date: Thursday - 4 April 2013 3:29 PM

Subject: Objection to the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP

Attachments: Mime.822

I oppose the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

1. I oppose the building waste processing plant because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I oppose the building waste processing plant because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer ('Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010). There is no known cure for silicosis ('A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club). This is an unacceptable health risk for local residents.
3. I oppose the building waste processing plant because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I oppose the building waste processing plant because the NSW Government has indicated there will be "a return of local planning powers to local communities" ('NSW govt scraps 3A planning provision', SMH, 4/4/2011). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (Minutes, Liverpool City Council meeting, 15/6/2011).
5. I oppose the building waste processing plant because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down their operations to create their own housing estate and marina.
6. I oppose the building waste processing plant because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (developer's information distributed on 31/5/2011 at New Brighton Golf Club). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I oppose the building waste processing plant because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. I oppose the building waste processing plant because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I oppose the building waste processing plant because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I OPPOSE the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to REJECT this proposal.

Please consider the above mentioned points and do your own assessment and stop this monstrous project to be built right outside our door steps. Families with children and elerly are living at the Georges Fair.

Thanks

Kumaravel Arcot

To Whom it May Concern,

Please find attached signed petitions opposing the proposal for the Waste Processing Project from local residents and community members who are strongly opposed to this proposal going ahead. We urge that this proposal is reconsidered in light of local community and residents effected by the planned Waste Processing Plant.

I oppose the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

1. I oppose the building waste processing plant because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I oppose the building waste processing plant because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (**'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010**). There is no known cure for silicosis (**'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010**). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (**pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club**). This is an unacceptable health risk for local residents.
3. I oppose the building waste processing plant because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I oppose the building waste processing plant because the NSW Government has indicated there will be "a return of local planning powers to local communities" (**'NSW govt scraps 3A planning provision', SMH, 4/4/2011**). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (**Minutes, Liverpool City Council meeting, 15/6/2011**).
5. I oppose the building waste processing plant because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down **their** operations to create their own housing estate and marina.
6. I oppose the building waste processing plant because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (**developer's information distributed on 31/5/2011 at New Brighton Golf Club**). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I oppose the building waste processing plant because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The

proposed development will have a severe impact on land values and residents will not be compensated.

8. I oppose the building waste processing plant because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I oppose the building waste processing plant because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I OPPOSE the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to REJECT this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I strongly oppose Moorebank Waste Processing Project (Project Number 05 0157) at Lot DP 1065574, Newbridge Road, Moorebank.

690

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing as well as proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. **I oppose the building waste processing plant** because the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer *('Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010).* There is no known cure for silicosis *(A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010).* The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" *(pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club).* This is definitely an unacceptable health risk for local residents, not to mention the many young children that have moved and are moving in Georges Fair estate.
3. **I oppose the building waste processing plant** because the potential of flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and materials stockpiles may cause an environmental disaster throughout Moorebank and the entire George's River Basin.
4. **I oppose the building waste processing plant** because the NSW Government has indicated that there will be "a return of local planning powers to local communities" *(NSW govt scraps 3A planning provision', SMH, 4/4/2011.* The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development 9Minutes, Liverpool City Council meeting, 15/6/2011.
5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility just 250metres from Georges Fair lousing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have begun to shut down *their* operations to create their own housing estate and marina.
6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" *(developer's information distributed on 31/5/2011 at New Brighton Golf Club).* Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion from their proposed facility, given the likelihood of the 'Intermodal'.
8. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
9. **I oppose the building waste processing plant** because there was lack of community consultation at a meeting held by the representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow sufficient time to note down and respond to residents' concerns.
10. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated in Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to buy another plant at Heathcote. There is no need for so many processing plants in such close proximity to each other.

As a local community member, I **passionately OPPOSE** the building waste processing plant. I call councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **most definitely REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

Proposal: [illegible] Project Number [illegible]

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I oppose the proposed Moorebank Waste Processing Project, Project Number [illegible] at Lot [illegible], Newbridge Road, Moorebank

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

698

1. 1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. 2. **I oppose the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents. **I AM AN ASMATIC WITH A YOUNG BOY. BOTH MY FAMILY AND I ARE VERY CONCERNED ABOUT THIS AND DISAPPOINTED THAT THIS IS ALLOWED TO BE CONSIDERED AND RECONSIDERED AFTER THE AMOUNT OF REJECTION THE LAST PROPOSED RECYCLING PLANT BROUGHT.**
3. 3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. 4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. 5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. 6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. 7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. 8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. 9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal. **PLEASE CONSIDER HOW YOU WOULD FEEL IF A RECYCLING PLANT WAS PROPOSED NEXT TO YOUR *NEW* HOME AND YOUNG FAMILY.**

FULL NAME:	SIGNATURE:	ADDRESS:	DATE:
Monique Magri	M.Magri	24 Sandstock st. Moorebank 2170	2/4/13

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

(99)

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks. Georges fair has beautiful parks and surrounding paths for walking and cycling. An increase in trucks will put the health and safety of our families at risk, increase dust exposure and increased risk of children been hit by a truck.
2. **I oppose the building waste processing plant** because of the risks from asbestos and toxins. The recycled material may include glass, fibre cement, clay, sandstone, asbestos and who knows what are building material. This dust will blow right across the Georges Fair estate, exposing all the residents of Georges Fair to this concrete dust and exposing us to a variety of respiratory illnesses. Concrete dust is very fine and impossible to get out of the lungs once inhaled. Studies have shown that inhaling small doses of concrete dust can decrease lung function. Moorebank recyclers will be exposing all residents to a variety of respiratory illnesses. It is exposing children to an increase risk of Asthma and of course all resident are at increased risk of chronic bronchitis, emphysema, acute silicosis, silicosis, lung cancer, kidney damage and scleroderma. The literature also states that it is wrong to assume that water spray can eliminate respirable dust. Visible dust can travel up to 1km while the thinier and lighter dust can travel longer distances. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina. We should be creating an area that been talk about because of the great things, such as the marina, lunches by the water. The dust hills are a health hazard and eye sore.
6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). 324 extra trucks on this road is to many for a road that was

only meant to be for cars and 50km zone, This is what they state now, but I'm sure they will try and expand there business and with this the amount of trucks will increase. Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. Moorebank recyclers Pty Ltd have stated that there is only 6,500 vehicles on Brickmakers Dr per day and 5-6% are trucks, I am up at 6am every morning and the trucks are continually going up and down Brickmakers Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. With the opening of Brickmakers Dr there is already an increase in noise pollution and congestion with trucks with trailers going up and down the road and this is 7days a week. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.

7. **I <u>oppose</u> the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated. To approve this application would devalue and destroy the livelihood of all the resident of Georges Fair, No one will want to live where themselves, their families and children are at risk of a variety of respiratory and skin conditions, and where they can't go out in there own backyards or parks due to the noise and pollution that we will be exposed to.
8. **I <u>oppose</u> the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. **I <u>oppose</u> the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.
10. **I <u>oppose</u> the building waste processing plant** as it is not providing employment opportunities and the building of the Marina will promote employment and development of local businesses. This recycling facility will destroy the local area and its health of its residents.
11. **I <u>oppose</u> the building waste processing plant** as the proposed operating hours will impact on the Georges fair resident, we will essentially only get one day of peace, they state they will cease at 6.00pm but again when they can make an extra dollar who is going to stop them working until 8pm, or that extra truck that gets stuck in traffic or decides to get an early start.

There is no good outcomes for local residents, the health risks alone should be enough to **<u>NOT</u>** approve this application, no recycling plant should be put near a residential area, especially when there is plenty of land that could be used away from where people are living.

As a local community member, I **<u>OPPOSE</u>** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **<u>REJECT</u>** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

102

1. I **oppose** **the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I **oppose** **the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. I **oppose** **the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose** **the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose** **the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose** **the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose** **the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose** **the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose** **the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

703

1. I **oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I **oppose the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. I **oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

[illegible]

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

709

Hi,

I oppose the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

1. I oppose the building waste processing plant because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I oppose the building waste processing plant because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer ('Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010). There is no known cure for silicosis ('A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club). This is an unacceptable health risk for local residents.
3. I oppose the building waste processing plant because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I oppose the building waste processing plant because the NSW Government has indicated there will be "a return of local planning powers to local communities" ('NSW govt scraps 3A planning provision', SMH, 4/4/2011). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (Minutes, Liverpool City Council meeting, 15/6/2011).
5. I oppose the building waste processing plant because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down their operations to create their own housing estate and marina.
6. I oppose the building waste processing plant because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (developer's information distributed on 31/5/2011 at New Brighton Golf Club). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I oppose the building waste processing plant because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed

development will have a severe impact on land values and residents will not be compensated.
8. I oppose the building waste processing plant because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I oppose the building waste processing plant because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.
As a local community member, I OPPOSE the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to REJECT this proposal.

Please consider the above mentioned points and do your own assessment and stop this monstrous project to be built right outside our door steps. Families with children and elderly are living at the Georges Fair.
Thanks

To whom it may concern;

I live in Georges Fair, please show your support to my opposition to the Moorebank Materials Recycling Facility. For the following reasons:

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP1065574, Newbridge Road, Moorebank.

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial

road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

Rami B

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I oppose the proposed Moorebank Waste Processing Project, Project Number [illegible], at Lot [illegible] DP [illegible] Newbridge Road Moorebank

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

15

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

1065574, Newbridge Road, Moorebank.

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

As a community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

FULL NAME: Ronald Ross **SIGNATURE:** **ADDRESS:** [illegible] **DATE:** 27/03/2013

EMAIL TO: plan_comment@planning.nsw.gov.au MAIL TO: NSW Department of Planning, GPO Box 39, NSW 2001 FAX TO: 9228 6455

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

717

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks. Georges fair has beautiful parks and surrounding paths for walking and cycling. An increase in trucks will put the health and safety of our families at risk, increase dust exposure and increased risk of children been hit by a truck.
2. **I oppose the building waste processing plant** because of the risks from asbestos and toxins. The recycled material may include glass, fibre cement, clay, sandstone, asbestos and who knows what are building material. This dust will blow right across the Georges Fair estate, exposing all the residents of Georges Fair to this concrete dust and exposing us to a variety of respiratory illnesses. Concrete dust is very fine and impossible to get out of the lungs once inhaled. Studies have shown that inhaling small doses of concrete dust can decrease lung function. Moorebank recyclers will be exposing all residents to a variety of respiratory illnesses. It is exposing children to an increase risk of Asthma and of course all resident are at increased risk of chronic bronchitis, emphysema, acute silicosis, silicosis, lung cancer, kidney damage and scleroderma. The literature also states that it is wrong to assume that water spray can eliminate respirable dust. Visible dust can travel up to 1km while the thinier and lighter dust can travel longer distances. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina. We should be creating an area that been talk about because of the great things, such as the marina, lunches by the water. The dust hills are a health hazard and eye sore.
6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial

roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. With the opening of Brickmakers Dr there is already an increase in noise pollution and congestion with trucks with trailers going up and down the road and this is 7days a week. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.

7. **I <u>oppose</u> the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated. To approve this application would devalue and destroy the livelihood of all the resident of Georges Fair, No one will want to live where themselves, their families and children are at risk of a variety of respiratory and skin conditions, and where they can't go out in there own backyards or parks due to the noise and pollution that we will be exposed to.
8. **I <u>oppose</u> the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. **I <u>oppose</u> the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.
10. **I <u>oppose</u> the building waste processing plant** as it is not providing employment opportunities and the building of the Marina will promote employment and development of local businesses. This recycling facility will destroy the local area and its health of its residents.

The health risks alone should be enough to **<u>NOT</u>** approve this application, no recycling plant should be put near a residential area, especially when there is plenty of land that could be used away from where people are living.

As a local community member, I **<u>OPPOSE</u>** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **<u>REJECT</u>** this proposal.

Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. I **oppose** **the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose** **the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose** **the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose** **the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose** **the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose** **the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose** **the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. 3. I **oppose** **the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose** **the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose** **the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose** **the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose** **the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose** **the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose** **the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I oppose the proposed Moorebank Waste Processing Project (Project Number 05_0157) at Lot 6 DP [illegible] Newbridge Road, Moorebank

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

3. I **oppose** **the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose** **the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose** **the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose** **the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose** **the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose** **the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose** **the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. **I oppose the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

I oppose the proposed Moorebank Waste Processing Project (Project Number 05_0157) at Lot 6 DP 1065574 Newbridge Road Moorebank

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. I **oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.
6. I **oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not experience any additional noise, pollution and congestion from this proposed facility, given the likelihood of the 'Intermodal'.
7. I **oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.
8. I **oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.
9. I **oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a local community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.

FULL NAME:	SIGNATURE:	ADDRESS:	DATE:

EMAIL TO: plan_comment@planning.nsw.gov.au MAIL TO: NSW Department of Planning, GPO Box 39, NSW 2001 FAX TO: 9228 6455

I **oppose** the proposed Moorebank Waste Processing Project (Project Number 05 0157) at Lot 6 DP 1065574, Newbridge Road, Moorebank.

739

1. I **oppose** **the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.
2. I **oppose** **the building waste processing plant** because of the risks from asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. There is a link between silica dust and lung cancer (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.
3. I **oppose** **the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.
4. I **oppose** **the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).
5. I **oppose** **the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. OPPOSITION TO MOOREBANK BUILDING WASTE PROCESSING PLANT

1. **I oppose the building waste processing plant** because the proposed development is far too close to existing and proposed residential homes. The proposed development is just 250 metres from the Georges Fair housing estate. Trucks using the proposed facility will travel even closer to residential homes. Trucks will likely short cut through Georges Fair, passing parks and local residents, using roads not designed for massive trucks.

2. **I oppose the building waste processing plant** because of the known risks from inevitable silica dust, asbestos and toxins. At the community consultation meeting held on 31/5/2011 at New Brighton Golf Club, the representatives of the developer refused to comment on whether asbestos would be processed at the facility and whether toxins would be released. It is well known that inhalable silica dust causes lung cancer and silicosis (*'Occupational Exposure to Silica and Lung Cancer', Cancer Epidemiology, Biomarkers and Prevention Journal, Volume 19, 2010*). There is no known cure for silicosis (*'A Brief Review of Silicosis in the US', Environ Health Insights, Volume 4, East Carolina University, 2010*). The building/construction materials proposed to be crushed at the plant inherently contain very high silica content. The developer plans to install sweepers "where trucks and people will travel" and that there are "unsealed areas" in the development. Their own documentation refers to "likely dust from the recycling facility" (*pg 3, developer's information distributed on 31/5/2011 at New Brighton Golf Club*). This is an unacceptable health risk for local residents.

3. **I oppose the building waste processing plant** because of the potential for flooding. The proposed development is in an area that floods. In the event of a flood, unsafe building materials and material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin.

4. **I oppose the building waste processing plant** because the NSW Government has indicated there will be "a return of local planning powers to local communities" (*'NSW govt scraps 3A planning provision', SMH, 4/4/2011*). The local community is opposed to this development. Councillors of the Liverpool City Council have voted unanimously against this development (*Minutes, Liverpool City Council meeting, 15/6/2011*).

5. **I oppose the building waste processing plant** because the proposed development is incompatible with the current and planned residential and recreational uses of the area. The proposed concrete processing facility is just 250 metres from the Georges Fair housing estate, with a high proportion of residents having young families. The area is zoned E2 Environmental Conservation. It should not be used for a concrete processing plant. In close proximity are schools, parklands, the Georges River itself, cycleways, a proposed waterside marina, a library and a golf club. The land is more suitable for recreational facilities or a reserve. Even the owners of the Benedict Recycling plant at Moorebank (which borders the proposed facility) have accepted that the area is no longer suitable for a building waste processing plant and have started to shut down *their* operations to create their own housing estate and marina.

6. **I oppose the building waste processing plant** because of increased traffic. The developer states the proposed facility will result in an extra 324 truck movements a day, which is "very low and will have no impact on the arterial road network" (*developer's information distributed on 31/5/2011 at New Brighton Golf Club*). Increased traffic will have a significant impact on arterial roads including Nuwarra Road, Newbridge Road and Governor Macquarie Drive. There is already significant traffic in the area which will be made worse by the 'Intermodal', which will cause an extra 1.5 million truck movements in the first year. Truck movements will primarily be in peak hours, further impacting on already high congestion. The residents of Moorebank and other areas should not be forced to suffer any additional noise, pollution and congestion from this proposed facility.

7. **I oppose the building waste processing plant** because of the negative impact on land values. Residents of the Moorebank precinct in particular have spent significant amounts of money on land and homes. The proposed development will have a severe impact on land values and residents will not be compensated.

8. **I oppose the building waste processing plant** because there was a lack of community consultation at a meeting held by representatives of the developers on 31/5/2011. The organisers did not notify a significant number of local residents and future residents about the meeting. The organisers refused to answer questions from local residents on health risks. The organisers did not allow time to note down and respond to residents' concerns.

9. **I oppose the building waste processing plant** because it is dangerous to residents for a concrete processing plant to be located in this area of metropolitan Sydney. There are pre-existing waste processing plants operated by Benedict Recycling and Smorgan Steel Recycling at Chipping Norton. Benedict Recycling is planning to build another plant at Heathcote. There is no need for so many waste processing plants in such close proximity to each other.

As a community member, I **OPPOSE** the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to **REJECT** this proposal.
