Daryl Morris, of Newtown NSW, made the following submission on the project:

Mangoola Mine - Modification 6 - Extraction Rate Increase

Objects to this project

In a time when science has a very good understanding that burning fossil fuel is becoming increasingly dangerous to all life. While Australia is the largest exporter of coal I imagine the world is growing in it's understanding that our country is becoming known as a rouge state that does not care about the greater good, but is caught up in short term economic gain which in other ways is already costing us greatly. You are our current community elders make healthy choices for the majority and not a focus on a few increasing their pockets. Expansion of this mine will only lock us in to our unhealthy dependency in fossil fuel further. I strongly oppose this mine and it's expansion.
