Dear Joel,

Re: Project Approval 06_0014 Mangoola Open Cut – Updated Blast Management Plan (BMP)

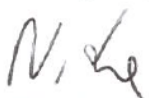

Please find attached an updated Blast Management Plan (BMP) for your review and approval. The Blast Management Plan includes a minor update following feedback received 6 January 2020.

Department requested changes	Change to document
<ol style="list-style-type: none">1. A timeline for installation and removal of the ladder and monitoring station;2. The proposed remediation measures for the ladder installation points	<ol style="list-style-type: none">1. A Note has been added to table 4.1 to clarify that monitoring equipment will be in place until blasting in the approved mine has been completed.2. A Note has been added to table 4.1 outlining the commitment to remove and remediate all monitoring sites once blasting has been completed.
A revised figure 4.1 to reflect the updated monitoring station.	As per discussions 6 January 2020, figure 4.1 legend has been updated to clearly show blast monitoring locations at private receptor representative, rock shelter and rock structure locations.

Following approval, document control details will be updated and authority correspondence added to Appendix A to publishing on the company website in accordance with Schedule 5 Condition 11PA 06_0014.

Should you require any further information with regards to the revised BMO, please don't hesitate to contact me on the below details.

Kind Regards,

Nathan Lane
