

RE: Submission Instruction

I wish to withdraw my submission dated 26 March 2013 after referencing material.

My new submission is as follows:

1. The development should additionally consider planting of local native plants surrounding the border of the carpark area. This will provide a barrier against the visual presence of motor vehicles.
2. Planting of native trees surrounding the structure to a height above the roofline of the building to break up the visual presence of the building.
3. Any signs marketing the shopping centre to be below roofline height to reduce prominence against remaining vegetation.
4. All neon or illuminated signs marketing the centre be timed to go out after 2200hrs to 0600hrs to prevent night time visual glare against natural surrounds.
5. Rain water recycling off roofline & drains of centre be implemented.
6. Grey water recycling from waste water outlets.

Yours sincerely,

Aaron Gray
