Dear Bree

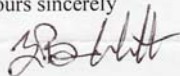

Re: Lot 101 DP 1087389

Eden Local Aboriginal Land Council have been consulted with and carried out an Aboriginal heritage assessment on the above Lot. This was carried out on the 18.03.08.

Eden LALC found the area to be cleared paddocks previously used as farmland and therefore any potential for in situ Aboriginal artefact scatters is low to medium. Due to these factors and the fact that over half the area consisted of steep hills, with a large portion of the flat area consisting of gully and creek systems, Eden LALC has considered the proposed development and would find it unnecessary for any further assessments to take place as no further evidence of sensitivity would be gained.

Eden LALC have no problem with the proposed development taking place with no further assessments needed. If you require any further information in relation to this, please don't hesitate to contact this office.

Yours sincerely

Laurence Bamblett
Sites Officer
