Dear Mr Murphy

Peppertree Quarry Modification 5 (PA 06_0074)

Thank you for providing WaterNSW with the opportunity to review and comment on Part B of the Response to Submissions (RTS) for the Peppertree Quarry modification application (06_0074 Mod 5).

WaterNSW has reviewed the RTS - Part B and held a teleconference with Boral staff regarding concerns for the long-term stability of the South West Overburden Emplacement (SWOE). In that teleconference, it was agreed that Boral will further consider the long-term stability of the SWOE, particularly in relation to potential erosion (sheet, rill and gully). In addition, Boral will engage an independent expert to determine if, and when, the SWOE is geomorphologically stable.

WaterNSW requests that it continues to be included as a stakeholder for the proposal. Further, WaterNSW would appreciate being notified when the application has been determined.

If you have any further questions, please contact Jim Caddey on (02) 4824 3401.

Yours sincerely
