Archival Photographic Recording of Queanbeyan Hospital

The photographic recording has been completed to NSW Heritage Office archival standards. The buildings exterior, interior and surrounds have been documented using 120 and 35mm B&W film and colour transparencies. The images have been scanned and placed on CDR as (.jpg) files. Documentation has been converted to Acrobat pdf files for cross platform use and placed on CDR.

All Black and White negatives have been processed & proofed to archival standard and all film and transparencies have been placed in archival quality holders. Thumbnails of each image are included in the report and all documentation has been printed on high quality low acid laser paper. The position and direction of where the image was taken have been marked on the plan.

Only the buildings that have been proposed for demolition or major works were recorded for this report. All exteriors were photographed but a sampling approach was taken with the buildings interiors with the exception of Rusten House where a complete recording was done.
