Re: David Maddison Building

Dear Chris,

The University has identified approximately 150 staff working within the DMB. Of these around 100 are full time and 50 or so part time. These staff work generally within normal business hours, 8.30am-5pm, but a small number attend of an evening or weekends. Several staff in the Animal Services Unit attend on all days, including public holidays and weekends. The University does not anticipate any significant changes to either the composition or total numbers of staff in the DMB in the foreseeable future.

The University will require continued access to the loading bay area between the DMB and RNH buildings, including the current under-croft used by the Regional Forensic Mortuary. Gas cylinder and bulk waste storage presently located to the East of the access road, will need to be relocated to suitable space immediately against the DMB once the HNE Health facility is finally closed. This may require some conversion of the existing Forensic Mortuary loading and parking bay.

Please do not hesitate to contact me if you have further queries.

Yours sincerely

Trevor Gerdson
Director Infrastructure
