Dear Sir/Madam

RE: ENVIROKING WASTE FACILITY - PROJECT APPLICATION 07_0048

I refer to your correspondence of 15 December, 2009 regarding an application by Enviroking Investments to expand their operation at Black Hill.

The Bloomfield Group does not object to the proposed expansion of the facility subject to the proponent ensuring all appropriate environmental controls and management practices are implemented and monitored. Emphasis should be given to both the management of the facility and potential land application sites.

It is essential that commitments stated in Section 6 of the Environmental Assessment (EA) are followed and the Environmental Management Plan (EMP) is refined to ensure that relevant guidelines for the application of waste are followed and implemented by the proponent. Periodic review of Enviroking's EMP should be undertaken to ensure that it remains current and reflects best management practices.

If the proponent can demonstrate that the ground injection of material as described in the EA satisfies all of the legislative requirements, the Bloomfield Group may consider acceptance of the material. Any application of material would be subject to appropriate controls being implemented and ongoing management and monitoring.

Please do not hesitate to contact Keren Halliday (02 49302 689) should you require any further information or details.

Yours Sincerely

BLOOMFIELD COLLIERIES PTY LIMITED
