Daniel Keary Director Infrastructure Projects Department of Planning GPO Box 39 SYDNEY NSW 2001

Attention: Mark Turner

Pacific Highway Upgrade Tintenbar to Ewingsdale Upgrade Project Request for Modification to Conditions of Approval – Schedule 2, Construction

Dear Sir,

I refer to the Planning Approval for the Pacific Highway Upgrade, Tintenbar to Ewingsdale of 29 January 2010 from the Minister for Planning received by the Roads and Traffic Authority (RTA) and in particular the Schedule 2 definition of Construction.

I also refer to your letter Ref. 9037893 of I November 2010 approving the RTA's Hairy Joint Grass Offset Package in accordance with Ministers Condition of Approval No. 2.4.

As described in previous correspondence with the Department, a number of pre-construction activities are required, and are underway, for the Tintenbar to Ewingsdale project. In order for RTA to meet State and Federal Government commitments for the project, it is both necessary and logical to program a number of activities prior to 'construction' as defined in Schedule 2 of Ministers Conditions of Approval.

One activity which RTA needs to commence as early as possible is the translocation of threatened species from within the project alignment, and in particular the *Arthraxon hispidus* 'Hairy Joint Grass' as identified in the RTA's Hairy Joint Grass Offset Package. The criticality of timing here relates to the optimisation of undertaking this work at the best seasonal time to ensure the maximum chance of translocation success, and the timely relocation of threatened species before the commencement critical activities.

By exception, 'minor clearing' is defined in Schedule 2 of the Conditions of Approval as a pre-construction activity, except where "heritage, threatened species populations or ecological communities would be affected". Additionally a number of Conditions of Approval require certain activities or outcomes to occur prior to the commencement of construction. The Departments advice of 1 November 2010 that "clearing of threatened species, populations or ecological communities is defined as construction, and therefore triggers a range of associated conditions including the need for a Construction Environmental Management Plan" is noted. Notwithstanding that a number of the Conditions of Approval actually require translocation or other pre-construction activities to occur "Prior to the commencement of Environment, Climate Change and Water (DECCW) and the Director General, it would appear that in order for these works to be undertaken, the Department of Planning (DoP) now requires a Construction Environmental

#### Roads and Traffic Authority

76 Victoria Street Grafton NSW 2460 PO Box 576 Grafton NSW 2460 DX7610 www.rta.nsw.gov.au | 02.6640 |300 Management Plan (CEMP) to be prepared and approved. Alternatively, DoP have verbally advised that the RTA could seek a Modification to the Schedule 2 definition of construction, which would allow these works to proceed earlier.

Accordingly RTA proposes that translocation activities are deemed pre-construction activities. In accordance with the Conditions of Approval, these activities are required to occur <u>prior</u> to the commencement of construction and do not involve the impacts of full construction. In the specific case of the Hairy Joint Grass the translocation activities also form an essential component of the approved Hairy Joint Grass Offset Package. Translocation of Hairy Joint Grass seedlings using hand shovel / trowel methods is considered to have very minimal, if any, environmental impact, particularly as such activities are contained within the project footprint. The following modification to the Schedule 2 definition of construction is therefore requested to allow such minor pre-construction activities: -

Construction	Includes all work in respect of the project <b>other than</b> survey; acquisitions; fencing; investigative drilling or excavation; building / road dilapidation surveys; minor clearing (except where heritage, threatened species, populations or ecological communities would be affected, <u>unless</u> <u>otherwise approved by the Director General, in consultation with DECCW</u> ; establishing ancillary facilities in locations meeting the criteria stated in these Conditions; or other activities determined by the Environmental Representative to have minimal environmental impact (e.g.
	minor access roads and adjustments to services / utilities, etc.)

It is noted that a similar definition has been agreed for the Pacific Highway Upgrade - Kempsey to Eungai Project which involved the clearing of 0.5Ha of Endangered Ecological Community.

As detailed in the Hairy Joint Grass Offset Package, the RTA remains committed to developing, documenting and successfully implementing the Offset Package in consultation with DECCW, DoP and Commonwealth Department of Environment, Water, Heritage and the Arts (DEWHA). Consultation with DECCW and DEWHA was undertaken during the development of the Offset Package, with records of consultation included in the final document submitted to DoP. Recent correspondence from DECCW to DoP and RTA, noting that Hairy Joint Grass Offset Package process needed to move forward is also noted.

In this regard, and as previously advised, the project ecologist Dr Andrew Benwell, has identified that in order to maximise the chance of translocation success, and based on current site climatic / seasonal conditions, the translocation works are required to be undertaken now, ie., during early November 2010. If this seasonal opportunity is missed, the translocation works would be delayed by 12 months until the next appropriate season, delaying this critical project. Due to these restricted timeframes, it would be appreciated if the Department could approve this requested modification as soon as possible; and, approve the translocation of the Hairy Joint Grass as per the Offset Package in accordance with that modification.

Should you require further information regarding this matter, please contact the RTA's Senior Project Manager, Strategic Projects Mr Peter Borrelli in the first instance on 02 6640 1022.

Yours faithfully

Robert (Bob) Higgins General Manager, Pacific Highway

# Request to modify a major project

Date duly made: 2 / 11/2010

# Modification No. 07\_0051 MOD 2

# 1. Before you lodge

This form is required under section 75W of the *Environmental Planning and Assessment Act 1979* (the Act) in order to request the Minister to modify the Minister's approval to carry out a project or concept plan to which Part 3A of the Act applies.

Before making this request, it is recommended that you first consult with the Department of Planning (the Department) concerning your modification. The Director-General may issue environmental assessment requirements that must be complied with before your request will be considered by the Minister. If the changes proposed by the modification will result in a project that is consistent with the existing approval, the Minister's approval for a modification is not required.

#### Disclosure Statement

Persons making a request to modify a project or concept plan are required to declare reportable political donations (including donations of or more than \$1,000) made in the previous two years.

Note: For more details about political donations disclosure requirements, including a disclosure form, go to www.planning.nsw.gov.au/donations.

#### Lodgement

All modification requests must be lodged with the Director-General of the Department of Planning, by courier or mail. An electronic copy should also be e-mailed to the assessment contact officer assigned to the project.
