Subject: Apex Energy Exploration Project 07_0103 Part 3A

Dear Rebecca / Alison,

I don't know whether you are the right people to notify of any objections to the above proposal for Methane Gas exploration in the Darkes Forest region of NSW, I do have a concern regarding the Drilling for the test bore holes - noise generated from this operation. Apex Energy have indicated that they will put in noise barriers if required, however I feel it would be better if they were put in place before the drilling operation commences, or do they supply sound insulation to the residence concerned as it would only be a handful of homes affected. As most of the drilling sites are well away from any residences, there are only two drill sites near any residences. If you are not the right people could you forward my concerns onto the person concerned.

Thank you.

Yours Sincerely

David Harper
