Content:
 Dear sir/madam,

Apex Energy has lodged a modification to their currently frozen coal seam gas development approval in the Illawarra. They have applied to extend drilling deadlines to "three years from commencement of drilling of the first bore hole" for 16 wells spanning two drinking water catchments (Woronora and Nepean).

Development must always be considered in the context of the surrounding area. This can change over time. Given this, a modification for an indefinite start date is irresponsible.

The risks of CSG mining are well evidenced and the Premier has acknowledged that the current legislation is not adequate to manage development of the industry. In this context, no new applications or modifications should be approved and existing projects should be frozen, to conduct an investigation into the full impacts of CSG development.

The drinking water catchment is unsuitable for CSG exploration and production. Allowing this development to go ahead contradicts the pre-election promise from Barry O'Farrell: "The next Liberal/National Government will ensure that mining cannot occur... in any water catchment area, and will ensure that mining leases and mining exploration permits reflect that common sense; no ifs, no buts, a guarantee."

The Illawarra Escarpment is a high risk bush fire area, exacerbated by its highly combustible peat base. Indeed, in August 2012 a bush fire burnt through AI09 and AI10 in this project. Extracting and piping gas in this environment will increase fire risks.

The development of this coal seam gas project is being layered on top of extensive coal mining and a fault line, without an assessment of the combined impacts.

There is widespread public opposition to CSG exploration and mining in the area. This includes a public petition of over 30,000 signatures, formal votes against CSG mining by local councils and two actions opposing CSG development attended by over 3,000 people each.

For all these reasons, the permission sought by Apex Energy to modify their Coal Seam Gas developments in the Illawarra must not be granted.

Yours sincerely
 Vincent Bicego
