Dear Ms Chapman

RE: Integrated Oilseed Processing Facility

Thank you for seeking Industry & Investment NSW (I&I NSW) comments on the proposed modification to the Integrated Oilseed Processing Facility at Wagga Wagga. Officers of I&I NSW have revised the documentation and report that there are no minerals or agricultural issues of interest to this department.

I&I NSW supports the nominated monitoring program as a means of early detection of trends thereby allowing some technical assessment of existing management practices. The proposal not to apply effluent to pasture/grazing situations but rather to cropping areas is also highly supported.

If further contact is required please contact me on the listed details.

Yours sincerely

David Davis
Resource Management Officer
