	Current condition of roads are currently unsuitable and roads are already unsafe for local traffic	The additional truck movements will make the roads unsafe for local road users	Issues related to the construction of the Bungonia By Pass & upgrade of Jerrara Rd	Adverse impact of increased heavy vehicle movements on local lifestyle or k amenity	Adverse impacts on school bus safety	Creation of heavy vehicle haul routes on local roads in preference to the approved principle product transport route.	Potential for impact on Windellema School (school located on either side of the road).	Cumulative impacts associated with heavy vehcile traffic using main road 92	The local roads have sections that are unsuitable as a haulage route for heavy vehicles	Impacts associated with noise & or vibration from trucks	Inadequate community consultation undertaken	Section 94 contributions should be required. What safeguards will be in place to ensure associated damage is paid for?	General objection to more trucks on the roads (there are already enough trucks & there is no need for more trucks).	Objection on the basis that local trafic is already pushed to the verge by exis trucks on these roads	Dangers with foggy road conditions & or flooding	Multiquip should be required to pay for road upgrades prior to using roads	The historic "Larbert Tree" should be protected	Local roads would be used due in prefernce to the approved product transport route	Traffic counts completed not adequate	No need for Multiquip to supply local market as there are already sufficient suppliers in the market	The application should have been made as a new application, not as a modification under s75W	Entry & exit from the quarry is dangerous to other road users	General objection to the Ardmore Park Quarry operation	No consideration of stock grazing on road & or wildlife issues along road	Reports prepared by the consultant inadequate	As demand for product grows movements of trucks will increase	Truck movements on Cullulla Road should not be increased	Existing Causeways, Crossings, Culverts, Channels are unsuitable for the movement of heavy vehicles	Unacceptable dust impacts due to dirt roads	No intersection assesment of driveways and local roads was completed along the route	Other roads should have been studied, e.g. Windellema Rd, Braidwood Rd	Objection on the basis that this represtns incremental approvals, opening the door for future modifications with greater level of impact
