SCHEDULE 3 STATEMENT OF COMMITMENTS

Subject	Commitments	Timing
505/000	The proposed development will be constructed in accordance with the plans and documentations	
Design	submitted with this Response to Submissions	Ongoing Upon approval
	A final plan of subdivision and a section 88b instrument will be submitted prior to occupation of the	Prior to issue of an Occupation
Subdivision	building	Certificate (or equivalent certification)
	A Remediation Action Plan will be prepared in accordance with the recommendations of the Phase II	
		Prior to issue of an Occupation
Site Contamination	Redevelopment , Darlington. Dated 18 June 2013)	Certificate (or equivalent certification)
	The University will continue to work with Darlington Public School on the detailed design and location	Prior to issue of an Occupation
Works at Darlington Public School	of works to be undertaken on and adjoining the school site	Certificate (or equivalent certification)
	The Hairparity will continue to work with Mandellower Herror to address security concerns at succed	Prior to issue of an Occupation
Consultation with Mandelbaum House	The University will continue to work with Mandelbaum House to address security concerns at ground level, and treatments to address concerns surrounding residents' privacy	Certificate (or equivalent certification)
nouse		
Vehicular Access and Pedestrian	The University will adopt the pedestrian safety measures outlined in Arup's statement titled 'Response to Comments from Planning NSW' and dated July 2012.	Prior to issue of an Occupation Certificate (or equivalent certification)
Safety	Construction noise will be managed in accordance with the recommendations of the Noise Impact	
	Statement prepared by Marshall Day and dated February 2012, and the preliminary Construction	
	management Plan prepared by University of Sydney dated February 2012. (The Marshall day	
	statement is supported by an Acoustic logic statement dated July 24 2013 confirming that the	Throughout the duration of
Construction Noise	statement is still valid)	construction works
	The Shepherd Centre will be relocated and operational off-site, subject to negotiation of an agreement	Prior to demolition of the Shepherd
Relocation of the Shepherd Centre	between both parties and the obligations of the lease arrangement.	Centre
	· · · · · · · · · · · · · · · · · · ·	
Childcare	A new childcare centre will be provided to replace the existing childcare centre on the site. The new childcare centre will have the same capacity as the existing centre.	Prior to demolition of the Childcare Centre
Cinideare		centre
	The recommendations put forward in the Non-Indigenous Archaeological Assessment prepared by	
Non-Indigenous Archaeology	Casey & Lowe Pty Ltd and dated November 2007 (Supported by Casey & Lowe Statement Dated 30 July	Prior to issue of an Occupation Certificate (or equivalent certification)
Non-mulgenous Archaeology	2013 confirming report is still valid) will be undertaken.	
	Trees to be retained will be protected in accordance with AS4970-2009 and the recommendations of	Throughout the duration of
Tree Protection	the Arboriculture Impact Report prepared by Landscape Matrix Pty Ltd.	construction works
		Prior to issue of an Occupation
Landscaping	The Sandstone kerbing will be retained and reused on the site as part of the landscaping design	Prior to issue of an Occupation Certificate (or equivalent certification)
Landscaping	The proposed development will include self evaluation of the project using Green Star Education v1	
	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the	Certificate (or equivalent certification)
Landscaping ESD	The proposed development will include self evaluation of the project using Green Star Education v1	
	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the	Certificate (or equivalent certification)
	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the Green Star Education v1 design calculator. The University will undertake the wind mitigation measures outlined in the Pedestrian Wind Environment Statement prepared by Windtech and dated February 2012	Certificate (or equivalent certification) Prior to occupation of the building
ESD	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the Green Star Education v1 design calculator. The University will undertake the wind mitigation measures outlined in the Pedestrian Wind Environment Statement prepared by Windtech and dated February 2012 The following Management Plans will be issued prior to the commencement of construction:	Certificate (or equivalent certification) Prior to occupation of the building Prior to issue of an Occupation
ESD	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the Green Star Education v1 design calculator. The University will undertake the wind mitigation measures outlined in the Pedestrian Wind Environment Statement prepared by Windtech and dated February 2012 The following Management Plans will be issued prior to the commencement of construction: Waste ECP	Certificate (or equivalent certification) Prior to occupation of the building Prior to issue of an Occupation
ESD	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the Green Star Education v1 design calculator. The University will undertake the wind mitigation measures outlined in the Pedestrian Wind Environment Statement prepared by Windtech and dated February 2012 The following Management Plans will be issued prior to the commencement of construction:	Certificate (or equivalent certification) Prior to occupation of the building Prior to issue of an Occupation
ESD	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the Green Star Education v1 design calculator. The University will undertake the wind mitigation measures outlined in the Pedestrian Wind Environment Statement prepared by Windtech and dated February 2012 The following Management Plans will be issued prior to the commencement of construction: Waste ECP Soil and Water ECP	Certificate (or equivalent certification) Prior to occupation of the building Prior to issue of an Occupation
ESD Wind Environmental and Construction	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the Green Star Education v1 design calculator. The University will undertake the wind mitigation measures outlined in the Pedestrian Wind Environment Statement prepared by Windtech and dated February 2012 The following Management Plans will be issued prior to the commencement of construction: Waste ECP Soil and Water ECP Contamination ECP Air Quality and Visual Amenity ECP Construction Traffic Management Plan	Certificate (or equivalent certification) Prior to occupation of the building Prior to issue of an Occupation Certificate (or equivalent certification) Prior to issue of an Occupation
ESD	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the Green Star Education v1 design calculator. The University will undertake the wind mitigation measures outlined in the Pedestrian Wind Environment Statement prepared by Windtech and dated February 2012 The following Management Plans will be issued prior to the commencement of construction: Waste ECP Soil and Water ECP Contamination ECP Air Quality and Visual Amenity ECP Construction Traffic Management Plan Construction Management Plan	Certificate (or equivalent certification) Prior to occupation of the building Prior to issue of an Occupation Certificate (or equivalent certification)
ESD Wind Environmental and Construction	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the Green Star Education v1 design calculator. The University will undertake the wind mitigation measures outlined in the Pedestrian Wind Environment Statement prepared by Windtech and dated February 2012 The following Management Plans will be issued prior to the commencement of construction: Waste ECP Soil and Water ECP Contamination ECP Air Quality and Visual Amenity ECP Construction Traffic Management Plan Construction Management Plan The University will undertake a flood study and implements its recommendations prior to	Certificate (or equivalent certification) Prior to occupation of the building Prior to issue of an Occupation Certificate (or equivalent certification) Prior to issue of an Occupation
ESD Wind Environmental and Construction	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the Green Star Education v1 design calculator. The University will undertake the wind mitigation measures outlined in the Pedestrian Wind Environment Statement prepared by Windtech and dated February 2012 The following Management Plans will be issued prior to the commencement of construction: Waste ECP Soil and Water ECP Contamination ECP Air Quality and Visual Amenity ECP Construction Traffic Management Plan Construction Management Plan The University will undertake a flood study and implements its recommendations prior to commencement of any works.	Certificate (or equivalent certification) Prior to occupation of the building Prior to issue of an Occupation Certificate (or equivalent certification) Prior to issue of an Occupation
ESD Wind Environmental and Construction	The proposed development will include self evaluation of the project using Green Star Education v1 tool, implementing all reasonable and feasible measures to target a 5 Star Green Star rating with the Green Star Education v1 design calculator.
