

ATTACHMENT 2
Modified Director-General's Requirements
Section 75W of the *Environmental Planning and Assessment Act 1979*
(For Transitional Part 3A Projects)

1. A description of the F Class Gas Turbine option available for the project and a clear justification for the inclusion of two options for electricity generation (E and F Classes).
2. An outline on the selection process, including timing, for determining the gas turbine technology to be utilised.
3. An assessment of the potential environmental impacts associated with the construction and operation of the F Class Gas Turbine technology, including those matters listed under items 4 to 14 of the requirements issued on 14 December 2011. Particular focus must be made to air quality, noise and waste impacts.
4. The environmental assessment must clearly articulate the differences between the environmental impacts associated with the E Class Gas Turbine technology approved and the F Class Gas Turbine technology option proposed.
5. The application must demonstrate adequate consultation with appropriate agencies, particularly the NSW Environment Protection Authority, regarding the two gas turbine technology options to be made available, including any licensing approval requirements.
