---

My husband, Matthew, and I would like to request the inclusion of a children's playground in the design of this subdivision. Given that the land is targeted at family housing, and the current lack of children's playground facilities in the nearby area, I believe this would be an important inclusion for the residents in this area.

Whilst I note that the design includes the 'indicative location for a future children's playground' my husband and I are concerned that this is clearly not a priority in the development of this land and that it may be left incomplete after all of the land has been sold. We believe that it is crucial that a children's playground be included not as an 'indicative location' but rather as an essential element in the building and development program which should take some priority because of its important contribution to the community.
