Thomas Bertwistle
Environmental Assessment Officer
Department of Planning, Industry and Environment

Via email: thomas.bertwistle@planning.nsw.gov.au

Dear Mr Bertwistle

SafeWork recommendations Orica Kooragang Island – Mod 5 (MP08_0129-Mod-5)

After reviewing the proposed development, we make the following recommendations for DPIE to consider:

1. Request Orica perform hazard identification and risk assessment for construction activities.
2. Request Orica pay special attention to overhead crane use and ensure any crane failure does not impact ammonium nitrate store or ammonia storage tank integrity.
3. Request Orica ensure any construction activities do not compromise housekeeping in the ammonium nitrate store, with special attention to: dust accumulation in AN store, oil leak from vehicles, other machinery result in contaminating AN store

If you have any questions regarding this, please contact Harit Jani on (02) 8867 2842 or email harit.jani@safework.nsw.gov.au

Yours sincerely

Michael Wright
Manager, Major Hazard Facilities
