Nick Hall  
NSW Planning

Dear Mr Hall,

This is a submission regarding the Marstel Bulk Fuel Terminal from the Mayfield East Public School P&C Association.

We strongly oppose the application for their terminal.

We believe our children's safety and well-being are threatened by this development, both by the presence of the terminal itself, and by the inexplicable proposal to transport such massive quantities of flammable and explosive liquids by road, which runs directly past our school.

We feel that we have no cause for confidence that Marstel will effectively safeguard this facility, nor that the relevant authorities will effectively ensure that they do.

We have a range of concerns and objections to this particular proposal, and to the poor planning processes that have been evident thus far in the redevelopment of the old BHP site.

The range of our concerns is well represented in the submission document prepared by the CPCFM group, of which I have attached a copy.

Regards,

Stephen Clarke  
Executive Officer
