Content:
I wish to make a formal objection to the proposal gazetted in the exhibition on the grounds that insufficient consideration has been given to the impact of the storage and transportation of chemicals on existing road haulage capacity.

Your reference to 'development of ancillary services and infrastructure, including internal roads' presumably with a view to storage and transportation is not specific enough. What is needed is a more detailed statement and plan outlining how diesel fuels would be transported to and from the port facility, taking into account the environmental impact of such a plan on the local residential area (Mayfield East).
