Dear Charles

**Consent for Development Applications
Lucas Heights Waste and Recycling Centre (LHWRC)**

I am writing in relation to WSN's pending development applications (DAs) for an Alternative Waste Technology (AWT) facility and truck parking area at the Lucas Heights Waste and Recycling Centre (LHWRC).

Sutherland Shire Council (Council) are the dual proponent for both these DAs and consent to each DA, as follows:

Environmental Assessment (EA) – AWT

Council have reviewed the draft Environmental Assessment (EA) which was submitted to the Department of Planning (DOP) by WSN on 9 April 2009. Council's official submission to DOP on 21 May 2009 regarding the EA was the same as those comments issued to WSN on 17 February 2009. SSC are comfortable with the amendments being made by WSN to address the comments from our review, prior to the final document being submitted to the DOP.

Council are supportive of the DA and have negotiated a commercial agreement which outlines our commitment and agreement to this project.

Statement of Environmental Effects – Truck Parking

Council have reviewed and approve the draft Statement of Environmental Effects for the truck parking facility (received by Council on 25 February 2009) and submitted in draft to the Department of Planning (DOP) on 25 May 2009.

Yours sincerely

J W Rayner
General Manager
