Re:Modification (MP08\_0172 MOD 3) - Helipad and Height increase

I object to the above proposal. I consider it unacceptable to approve a submission that allows for the exceeding of allowed noise levels of 95dB(A) in any circumstances. I do not feel that a sufficient argument has been established for the inclusion of a second helipad, and consider the current helipad and its usage to be suitable for the new development considering that the proposal is that this will remain the primary helipad for the hospital. I also feel that the debate on the need for a second helipad should have been decided in the original submission rather than at this late stage of the building of the development.
