

This architectural floor plan illustrates the 1st floor of the 'House of the Future'. The plan is divided into several functional zones, each highlighted with a different color: green for outdoor spaces, yellow for circulation and service areas, and blue for specialized functional zones. Key areas include:

- Outdoor Spaces (Green):** Located around the perimeter and between central buildings, these areas include lawns, patios, and a large central courtyard.
- Circulation and Service (Yellow):** This network includes corridors, stairs, and service areas that connect the various functional zones.
- Specialized Functional Zones (Blue):** These include a 'Specialized Function' area, a 'Specialized Function' area, and a 'Specialized Function' area, each designed for specific activities.
- Structural and Orientation Elements:** The plan features a grid system with letters (A-M) and numbers (1-12) for reference. A north arrow is located in the upper right corner, and a scale bar is provided in the lower left corner.

The plan also shows a detailed view of a building section on the right side, providing a three-dimensional perspective of the structure's form and volume.
