SHEET LAYOUT

NOT TO SCALE

Notes:
 1. Digitised services shown have been compiled from available services diagrams and data received from Sydney University. The position of these services is approximate only and should be verified before any construction. If service locations are critical then those service lines should be potholed and their position should be updated. Prior to any demolition, excavation or construction on the site, the relevant authority should be contacted for possible location of further underground services and detailed locations of all services.
 This note is an integral part of this plan.
