Dear Mr Cadogan

RE: MP09 0066 Mod 6

This is a response to the major project development: MP09_0066 which is at Thomas Street, Chatswood.

It has come to my attention that the proposed development which was previously approved as an office building has now; under many modifications gained approval for use as a serviced apartment and apartment development. The large scale of the building is a little worrying. The sixth modification which proposes to increase the approved height to an alarming 47 storeys for one building and 37 storeys for the other is concerning. This could lead to a loss of visual amenity for not only tenants in the same building as us but also for many buildings in the area that have a lovely view of the city.

Therefore I object to propose modification 6.
