| Certification..... | vi |
| Glossary of terms and abbreviations | vii |
| Executive Summary..... | x |
| 1 | Introduction 1 |
| 1.1 | The project 1 |
| 1.2 | Project location and study area 2 |
| 1.3 | Structure of the environmental assessment report 2 |
| 2 | Strategic justification and project need 7 |
| 2.1 | Strategic context 7 |
| 2.2 | Need for the project 10 |
| 2.3 | Key project objectives 11 |
| 2.4 | Statement of strategic need 13 |
| 3 | Project alternatives..... 14 |
| 3.1 | Alternatives considered..... 14 |
| 3.2 | Confirmation of the project as the preferred option 23 |
| 4 | Description of the project 24 |
| 4.1 | Project scope 24 |
| 4.2 | Details of project elements 29 |
| 4.3 | Design 34 |
| 4.4 | Construction 38 |
| 5 | Assessment process 45 |
| 5.1 | Statutory context 45 |
| 5.2 | Environmental planning instruments..... 46 |
| 5.3 | Planning and approval process..... 46 |
| 6 | Consultation..... 49 |
| 6.1 | Report on the consultation process 49 |
| 6.2 | Consultation objectives 50 |
| 6.3 | Consultation process and activities to date 51 |
| 6.4 | Issues raised on preferred route selection and concept design 55 |
| 6.5 | Consultation during preparation of this environmental assessment 55 |
| 6.6 | Consultation proposed during environmental assessment exhibition 57 |
| 6.7 | Consultation proposed during construction 58 |
| 7 | Assessment of key issues 59 |
| 7.1 | Impacts on ecology 59 |
| 7.2 | Impacts on channel structure - receiving environments..... 106 |
| 7.3 | Operational traffic and transport implications..... 122 |

| | | |
|------|---|-----|
| 7.4 | Operational noise impacts | 127 |
| 7.5 | Aboriginal heritage impacts | 134 |
| 7.6 | General construction impacts..... | 142 |
| 8 | Other issues | 164 |
| 8.1 | Non-Aboriginal heritage | 164 |
| 8.2 | Land use and socio-economic impacts..... | 172 |
| 8.3 | Greenhouse gas emissions and climate change | 182 |
| 8.4 | Landscape character and visual impacts..... | 187 |
| 8.5 | Air quality..... | 190 |
| 8.6 | Hazards and risks | 194 |
| 8.7 | Waste management..... | 195 |
| 9 | Environmental risk analysis..... | 198 |
| 9.1 | Environmental risk analysis methodology | 198 |
| 9.2 | Environmental risk analysis results..... | 199 |
| 10 | Draft Statement of Commitments | 211 |
| 11 | Justification and conclusion | 223 |
| 11.1 | Summary of strategic and project need..... | 223 |
| 11.2 | Justification | 224 |
| 11.3 | Conclusion | 232 |
| 12 | References..... | 234 |

List of tables

| | |
|-------------|--|
| Table 2-1 | Project objectives |
| Table 3-1 | Wells Crossing to Iluka Road route options, Glenugie upgrade area |
| Table 3-2 | Potential impacts of Wells Crossing to Iluka Road route options, Glenugie upgrade area |
| Table 4-1 | Proposed drainage structures and associated fauna passage |
| Table 4-2 | Proposed dedicated fauna underpass structures |
| Table 4-3 | Proposed overhead (rope) fauna crossings |
| Table 4-4 | Indicative details of road furniture and fencing |
| Table 4-5 | Concept design criteria |
| Table 4-6 | Potential pre-construction and construction activities |
| Table 4-7 | Resources and indicative quantities required for construction |
| Table 4-8 | Water volumes required for construction |
| Table 6-1 | Report of the consultation process |
| Table 6-2 | Stakeholders consulted for the Wells Crossing to Iluka Road upgrade |
| Table 6-3 | Consultation during selection of the preferred route |
| Table 6-4 | Consultation during the development of the concept design |
| Table 6-5 | Consultation during preparation of environmental assessment |
| Table 6-6 | Issues raised during preparation of environmental assessment |
| Table 7-1-1 | Vegetation types in the study area |
| Table 7-1-2 | Threatened flora in the study area |

| | |
|--------------|---|
| Table 7 1-3 | Endangered ecological communities |
| Table 7-1-4 | Threatened fauna in the study area |
| Table 7-1-5 | Description of aquatic fauna sampling sites |
| Table 7-1-6 | Direct impacts on vegetation, fauna habitat and threatened species |
| Table 7-1-7 | Threatened species assessment of significance summary |
| Table 7-1-8 | Key threatening processes related to the project |
| Table 7-1-9 | Habitat loss associated with the Pacific Highway Upgrade Program |
| Table 7-1-10 | Avoidance, mitigation and offset measures for threatened species |
| Table 7-1-11 | Underpass structures proposed for fauna passage |
| Table 7-1-12 | Canopy rope structures proposed for fauna passage |
| Table 7-1-13 | Impact mitigation measures for habitat fragmentation |
| Table 7-2-1 | Summary of channel instability features |
| Table 7-2-2 | Summary of State of the Rivers scores |
| Table 7-2-3 | Predicted runoff from existing highway and operating project |
| Table 7-3-1 | Trip generation for access points from Pacific Highway |
| Table 7-3-2 | Forecast traffic volumes for the Pacific Highway at Glenugie |
| Table 7-4-1 | Summary of traffic noise monitoring descriptors |
| Table 7-4-2 | Summary of unattended environmental noise monitoring descriptors |
| Table 7-4-3 | Road traffic noise base criteria |
| Table 7-4-4 | Summary of modelling inputs |
| Table 7-4-5 | Summary of road traffic data inputs for noise modelling |
| Table 7-4-6 | Modelled road traffic noise levels |
| Table 7-5-1 | Cultural heritage impact assessment guidelines checklist |
| Table 7-6-1 | Project noise objectives |
| Table 7-6-2 | Anticipated construction activities |
| Table 7-6-3 | Predicted noise levels resulting from construction |
| Table 7-6-4 | Potential noise sources at an operational batching plant |
| Table 7-6-5 | Limiting criteria for the control of blasting impact at residences |
| Table 7-6-6 | Minimum distances to comply with blasting vibration and over-pressure limits for various MIC values |
| Table 7-6-7 | Summary of anticipated vibration levels for construction activities |
| Table 7-6-8 | Potential vibration impacts |
| Table 7-6-9 | Potential sources of quarry material |
| Table 7-6-10 | Mean dry weather water quality results (12 to 14 May 2009) |
| Table 8-2-1 | Forest management zone classification |
| Table 8-2-2 | Area of each forest management zone affected by the project |
| Table 8-3-1 | Construction greenhouse gas emissions |
| Table 8-3-2 | CO _{2-e} emission estimates for the project |
| Table 8-4-1 | Landscape character |
| Table 8-5-1 | Korora air quality monitoring results |
| Table 9-1 | Risk analysis categories and criteria |
| Table 9-2 | Environmental risk analysis |
| Table 10-1 | Draft statement of commitments |
| Table 11-1 | Potential cumulative and synergistic impacts of the project |
| Table 11-2 | Objects of the EP&A Act and relevance to the project |
| Table 11-3 | Application of the principles of ESD to the project |

List of figures

| | |
|---------------|--|
| Figure 1-1 | Regional context |
| Figure 1-2 | The project – Motorway style upgrade proposal |
| Figure 1-3 | The project – Likely initial staging |
| Figure 3-1 | Wells crossing to Iluka Road route options, Glenugie upgrade area |
| Figure 3-2 | Options considered in route refinement |
| Figure 4-1a | Full motorway style upgrade – sheet 1 |
| Figure 4-1b | Full motorway style upgrade – sheet 2 |
| Figure 4-1c | Full motorway style upgrade – sheet 3 |
| Figure 4-2 | Typical cross section for a motorway style upgrade |
| Figure 5-1 | Steps in the Part 3A assessment and approval process |
| Figure 7-1-1 | Vegetation communities in the study area |
| Figure 7-1-2 | Threatened flora in the study area |
| Figure 7-1-3 | Endangered ecological communities |
| Figure 7-1-4 | Threatened fauna in the study area |
| Figure 7-1-5 | Key habitats and corridors |
| Figure 7-1-6 | Fauna crossing structures |
| Figure 7-2-1 | Locations of field sites and channel features |
| Figure 7-2-1a | Locations of field sites and channel instability risk scores – Sheet 1 |
| Figure 7-2-1b | Locations of field sites and channel instability risk scores – Sheet 2 |
| Figure 7-2-1c | Locations of field sites and channel instability risk scores – Sheet 3 |
| Figure 7-2-2 | Existing condition of Glenugie Creek upstream of existing highway |
| Figure 7-2-3 | Existing condition of creeks downstream of existing highway |
| Figure 7-2-4 | Existing condition of Glenugie Creek downstream of existing highway |
| Figure 7-4-1 | Locations of sensitive receivers and the noise monitoring site |
| Figure 7-6-1 | Estimated reduction of construction noise with distance from source |
| Figure 7-6-2 | Predicted noise levels with increasing distance from batching plant |
| Figure 7-6-3 | Water quality sampling locations |
| Figure 8-1-1 | Extract from 1909 map of the Parish of Lanitza, County of Clarence |
| Figure 8-1-2 | Extract from 1925 map of the Parish of Lanitza, County of Clarence |
| Figure 8-1-3 | Parts of the remnant tramway alignment in the project area. |
| Figure 8-1-4 | Section of remnant tramway alignment impacted by the project |
| Figure 8-2-1 | Existing land use |
| Figure 8-2-2 | State forest management zones |
| Figure 8-3-1 | CO ₂ emissions during operation of the project |
| Figure 8-4-1 | The existing Pacific Highway through Glenugie State Forest |

List of appendices

Appendix A - Director General's Requirements and checklist
Appendix B – Minister's Orders
Appendix C – Consultation issues checklist
Appendix D - Technical Working Paper: Ecology
Appendix E - Technical Working Paper: Cultural heritage
Appendix F - Technical Working Paper: Noise and vibration assessment
Appendix G - Framework Construction Environmental Management Plan
