Dear Mr Champion

**Champions Quarry Project Modification 4 (MP 09_0080)
Request for Clarification of Landowners' Consent**

I refer to your modification application of 5 June 2018 for the Champions Quarry Project.

The Department has reviewed the documents submitted in support of the modification application and notes that, whilst the application signed by yourself advised that landowners' consent had been obtained, no documentary evidence of consent from either yourself or other landowners was provided. Under section 49 of the *Environmental Planning and Assessment Act 1979*, a modification application must be accompanied by evidence that the owner/s of all land to which a development proposal relates have consented to the application.

With respect to your modification application, the Department also notes that there has been a change of quarry operator since the application was submitted, and that some commercial or other agreements between the operators and landowners (or between landowners) may have also changed.

Therefore, the Department requests that you (or the company now responsible for progressing the modification application) provide written evidence of landowner's consent from the owners of each of the six parcels of land listed in Schedule 1 of the consent.

The Department also wishes to advise that until this evidence is provided, it will be unable to determine the modification application, in accordance with clause 193 of the *Environmental Planning and Assessment Regulation 2000*.

If you could please provide this information at your earliest convenience.

Should you have any enquiries in relation to this matter, please contact Melissa Anderson via the details above.

Yours sincerely,

Howard Reed
