

**Ronald Burton** , of **Forest Reefs NSW**, made the following submission on the project:

Sapphire Wind

#### **Objects to this project**

I object because the research by independent people needs to be done before any more wind farms are approved as per the Senate Enquiry and their findings. Also inquiries should be made public as to the running costs paid by the taxpayer in subsidies to keep these industrial turbines running. According to overseas reports governments are now stopping subsidies to developers as they have now discovered they are costly and inefficient.
