Boco Rock Wind Farm Public Opinion Surveys

Boco Rock Wind Farm Public Opinion Surveys – Landscape Values

29th September, 2008.

Dear Ed,

I am writing in response to your letter dated 26th September 2008, requesting parameters to guide the placement of turbines in relation to our land.

I would preface our requirements with two comments:

1. As you are aware, we value very highly the magnificent landscape and views of and from our property. We feel any wind turbine development in the surrounding areas will severely compromise these values. However, we respect there are a broad range of views regarding wind turbines. What is entirely unacceptable to us about the current proposal is that not only does it make no attempt to reduce the aesthetic impact on our property, but the placement of turbines in close proximity to our boundary severely compromises the utility of our property, and its viability as a livestock production enterprise.
2. Having received a plan with proposed turbine placements less than seven days ago, our thoughts at this stage are only preliminary. We are currently trying to source further information regarding the distance required from turbines for unimpeded stock movement, and the impact of noise, shadows, flicker etc. The photo montages will assist us in visualizing the impact of the turbines.

Having regard to the above, our current thoughts about parameters that would reduce the impact on the workability of our property are:

- 1) Moving turbines back a minimum of 500 metres from our boundary. This would reduce the impact on stock movement, as well as create some sort of buffer zone in relation to noise, shadow, and aesthetic impact.
- 2) Removing turbine(s) that would render our airstrip hazardous/unusable.
- 3) Removing turbines that have an aesthetic/noise impact on the homestead and surrounding cottages and working area.
- 4) Unimpeded stock movement along our laneway system, as well as through the property of [REDACTED] through which we have legal access.

Regards

[REDACTED]

[REDACTED]

3 October 2008

Dear Mr Mounsey

I read the article in the Cooma Monaro Express yesterday concerning the proposed wind farm at Boco in the Monaro. I moved to the Monaro (to a small property in the Kybeyan Valley outside Nimmitabel) from Sydney 18 months ago and soon became aware of the various proposals for wind farms in the region. I am also a friend of the [REDACTED] although they are not yet aware that I have decided to contact you to register my objections to the proposal (as invited at the end of the article).

My objections to wind farming in the Monaro are possibly more general than those of the landholders who, like the [REDACTED], are facing direct contact with the industry. I have a lifelong affinity with the Monaro beginning with childhood holidays in the Nimmitabel area- in fact on one of the properties participating in the Boco Rock venture. I spent many happy days riding and mustering sheep in the very area you are considering and the thought that those ranges will be developed for any industry, albeit one with claims to be green, is a horrifying prospect. I am not anti-wind farms as such and I am, like everyone on the planet, acutely aware of the broad-ranging action required to reduce CO2 emissions and reduce our reliance on non-renewable energy sources. These are not straightforward matters and just because they are major and challenging goals doesn't preclude wise and cautious decision-making. On the contrary, in the heat of all the pressure to act on these issues, it is also essential not to lose sight of the impact any proposed solution also has on the planet. Just because a green industry is prepared to make an investment in an area that has an untapped green resource doesn't make it a good or even green proposal. I realise an EIS is an essential part of any proposal; what is of far greater concern to me is the willingness to sacrifice exceptionally beautiful countryside in the name of a noble cause (ie. saving the planet)- isn't this a contradiction? Are the feasible sites for these solutions so few that we have no choice but to compromise this valuable and irreplaceable heritage? This site and others like it in the Monaro are already being exploited for their green resource by green agriculture. Unfortunately, they are also a soft target for exploitation.

Many people find wind turbines beautiful, so it is of little consequence to argue that they are ugly as I believe. What is undeniable is that this is an industrial development which will change the nature of these rural landscapes forever. Wind energy generation is not "farming"- it is big-scale, invasive industry and no other industrial development of this countryside would be countenanced so why is it different for wind turbines? Is it because the future of the planet depends on this development proceeding or is it because a group of landholders have been persuaded to overlook any possible drawbacks or impact because of the enormous financial gain being offered?

The vast amounts of money being made available for these ventures, the sensitivity of the locations plus the inevitable damage to the fabric of the community (I am sure you are aware that the irreversible destruction to lifelong friendships is widespread regardless of whether the projects proceed or not- this communities will never be the same now) are compelling reasons to make the process as open and as rigorous as possible. I wonder for example if the great natural beauty of this site (and the Monaro in general) even rates a mention in your "preliminary environmental assessment"? Is this document available for discussion? What value does your company place on the beauty of this site? Have there been wind turbine proposals which have been met with comparatively little or no resistance and if so what makes those proposals uncontroversial? I think the starting point for these projects should be whether or not there are far less sensitive regions available for development. Presumably that is why, in the first place, they are being located here rather than say on the Heads at the mouth of Sydney Harbour?

Finally, may I ask how sound the modelling has been for this site? The Monaro is undoubtedly a windy area....some of the time. Have your tests reflected that for 4 months over autumn and early winter (I recall) hardly a breath of wind registered on my personal 'radar'. August/September are regularly windy months I am told but for the remainder of the year it can be endlessly calm I have noted even in my short residency.

I will attend your public forum and I look forward to unequivocal answers to these questions.

Yours faithfully

Subject: questions re Boco Rock project

Ed

Thankyou for the call yesterday. I was grateful for the opportunity to discuss the project even though it appears there is little chance of a compromise solution let alone a meeting of minds on the subject. As I was unable to open the letter I emailed to you (thanks to a suspension of power to the area) I missed an opportunity to re-ask some questions that keep coming to mind. In essence, my objection to the use of this site (and the Springfield Rd and Brothers sites) is the damage that will be done to exceptional landscape. There is another level of objections related to the encroachment on the amenity of the neighbours in each case but for me it is mostly about this: spoiling a finite resource (the beauty of our landscape) in favour of another resource that is limitless ie. wind. I think it is spurious to claim that we are obliged to install turbines everywhere we can to meet targets. If that is the only way to meet these targets (where did you say those targets came from again?) then we have to rethink the targets. Ruining almost pristine landscape for green energy is not a green solution (unless you are talking about the 'colour of money').

Part of the problem for my argument however is that so few people are aware of how beautiful and vast this region is. My Sydney friends who now visit me are amazed by the scale and space. I think these Monaro landscapes are so extraordinary they should be placed on some national register to ensure their preservation. Of course most farmers would be horrified by this suggestion and it has come as a shock to me to learn that so many of them are keen to sacrifice this irreplaceable heritage (of the nation as well as of their families) for their own relatively short-term gain. We are not talking about poor struggling farmers here and in any event I don't feel they have an unquestionable right to alter the landscape on a great scale any more than city dwellers have a right to make major changes to an historic house they own. This landscape is dwindling for all sorts of other reasons and is a precious thing. The beauty of these places will be all the more significant over the time span that we now consider essential for CO2 emissions reduction. There are few areas as undeveloped as this part of the state and I think it's important to keep it that way for future generations. That's a target to consider as well.

I suppose it's pointless expecting an industrial developer to consider these matters conscientiously. Your position is reasonable provided (I stress) you have considered all other options thoroughly. This is your responsibility as a well; not

just meeting targets. Of course you will get all the requisite impact statements commissioned (but I would rather these were not your responsibility) and we the public will have an opportunity to raise objections but if a site as staggeringly beautiful as Lake George can be sacrificed in this rush to go green then I have little hope of saving the Monaro. Unfortunately, there are also groups of people dedicated to reducing carbon emissions by any means possible who will be willing partners in promoting these wind projects. I think I probably heard one or 2 of them contribute to the recent discussion on ABC local radio. I do wonder why these people are so uncritical of the individual proposals however.

Meanwhile, I've been trying to look at the area in a different light noting some prominent parts of the Monaro that might be quite suitable (visually) for turbine construction I feel. Of course I have no idea what the impediments might be but if the south-east is the exceptional wind resource everyone claims it is then I doubt wind supply is one of them. As I asked in my initial letter to you: how much better/more reliable is the wind at Boco Rock than anywhere else in the Monaro? For example, I would suggest anywhere from the Old Dangelong Rd turnoff on the Monaro highway south of Cooma through to Polo Flat and Rose Valley. Don't quote me- it's just a suggestion of the type of landscape I think is preferable if pressed: basically, anywhere that's already feeling the effects of small-scale development (small subdivisions, local council land etc). Why do these enormously intrusive developments have to be in the middle of nowhere at all?

So let me leave this thought with you: I would not object to wind farms in the Monaro IF you would reconsider where they are to be located. My preference is for sites closer to towns. They can be very visible but visually comparatively bland ie. almost or in fact semi- industrial already. The problem with the sites you and others are considering so far is that they are in exceptionally beautiful parts of the Monaro with a visual impact far beyond their immediate location and which destroy an already precious resource (let's not get into the "some people like the look of them" argument here). Treat them and therefore their location like any industrial development (which they are) and the solutions will be far less controversial. The fact that the landholders in and around Boco Rock want these turbines in their 'back yards' is, finally, irrelevant.

regards

REAL Monaro

Reduced Emissions and Landscape for Monaro

10th October 2008

Dear Mr. Mounsey,

Re: Boco Rock Wind Farm

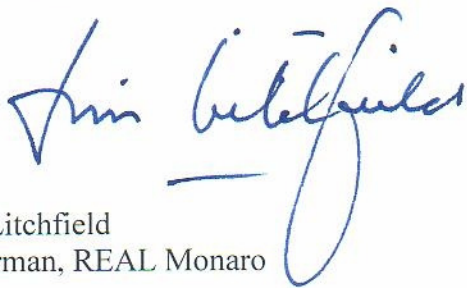

I write with regard to the proposed wind farm development "Boco Rock Windfarm" on the Monaro between Nimmitabel and Bombala and to introduce you to REAL Monaro.

REAL Monaro is a group of Monaro residents concerned with inappropriate wind energy development. REAL Monaro is not opposed to wind energy per se but is opposed to developments that have a negative impact on landscape and on landholders adjoining proposed development sites. As the proposed Boco Rock Wind Farm will have considerable impact and disadvantages to the [REDACTED] we will be assisting them, and other landholders, in their endeavour to minimize as much as possible the impact of the windfarm on the **operation, aesthetic quality and economic value** of their farm.

We request confirmation that the process of community consultation will give due consideration to these three factors and the views of the Taylors, and other affected landholders that may make themselves known to either REAL Monaro or Wind Prospects in the future. We also request confirmation that changes to the layout and / or size of the wind farm will be in direct response to the above factors and Wind Prospects will make tangible improvements to ameliorate the influence the wind farm development has on these issues.

I look forward to your response.

Yours Sincerely,

A handwritten signature in blue ink, appearing to read "Jim Litchfield". The signature is fluid and cursive, with a long horizontal stroke at the end.

Jim Litchfield

28/10/08

To Wind Prospect,

this is an article I came across from our local paper which I thought made sense. I don't agree with 'Wind Turbines', especially ones of such large scale and size. Their materials alone would require a huge amount of energy to build, not to mention to transport, but most worryingly is the area needed to be concreted to erect these monsters. They would indeed ruin and destroy large amounts of what would be 'native vegetation and grasses', therefore cause loss of habitat for our small, unseen creatures such as skinks, snakes, spiders, etc. The area required to accommodate these giant turbines would be substantial and therefore damaging to the environment. This is only one of many reasons why Wind Turbines should not go ahead, our lands are precious.

Why not instead supply households with an option of erecting or installing a smaller version of a 'Wind Turbine' to their roof tops, now there's an idea!

I believe in progress, but
not at the expense of
our environment.

Many thanks,

P.S
PLEASE SEND ME A COPY
OF YOUR 'PUBLIC OPINION
SURVEY'

Wind farm subsidy a waste of money

EDITOR: If wind farms were the best thing since sliced bread, there would be no www.nationalwindwatch.org.

The bulk of people contributing to it are genuinely aggrieved, ordinary folk, with no link to the coal lobby at all.

For example, "Testimony of Wendy Todd to Maine legislature, April 30, 2007", regarding Mars Hill Wind Project, Kansas.

Frankly it makes more sense to clean up the coal industry than to proliferate another nuisance industry, whose claims are unsubstantiated, and whose image seems to instil complacency among folk concerning energy conservation.

It makes more sense for instance, to redirect the money given to constructing

one turbine, to insulating 3000 needy homes.

If every light bulb in the world were replaced by a more efficient one, how many entire power plants could be shut down? LOTS!

- Subsidise all industry to become more energy efficient and environmentally responsible.

- Subsidise manufacture of quality, longer-lasting products, and mandate warranties of 5+ years (including bolts and screws...).

- Subsidise and support farmers to further engage in sustainable, organic and carbon friendly methods of food production.

- Educate folk to require LESS energy,

to be prudent shoppers and responsible breeders.

By 2040, the world is estimated to host more humans than it can sustain, ie double the current population. Renewable energy such as Geothermal and Solarthermal hold much more genuinely optimistic solutions, and are better candidates for our subsidy dollars.

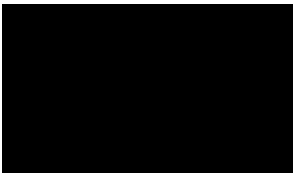

There are so many more effective alternatives to your "\$3million a pop" turbines!

Truth is large power companies want to sell lots of energy.

Reducing energy usage and demand will reduce their profits.

ETARIES OCT 2008

The Manager
Wind Prospect CWP Pty Ltd
PO Box 1708
Newcastle NSW 2300

Dear Sir/Madam,

Re: Proposed Boco Rock Wind Farm

I have received your newsletter dated February 2009 concerning the above proposed development and return the survey form.

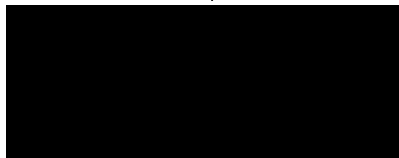

The suggestion by your company in its self-serving literature that the construction of 127 wind turbines on the Monaro is a perfectly acceptable development is akin, in my view, to suggesting that it would be acceptable to construct 127 wind turbines at the top of the Snowy Mountain Range, the Blue Mountains, North or South head or the foreshore of Sydney Harbour, at Uluru, the entrance to Port Phillip Bay or the Dandenongs.

Please forward the following information to me within the following 21 days:-

1. I assume that the proposed developer is foreign owned and that all net profits from the proposed development will be received by persons or entities outside Australia. Please confirm that my assumptions are correct or advise me of the correct position.
2. What is the approximate cost of the proposed 127 wind turbines, where are they to be built, what company or entity will receive or is likely to receive the sale proceeds (and where is its place of business)?
3. What carbon emissions are produced in the construction and erection of the proposed 127 wind turbines?
4. How is it proposed that a fire on any of the proposed wind turbines be extinguished, and by whom?
5. What guarantee is there that the wind turbines will be removed in the event of their de-commissioning?
6. Does your company propose to obtain valuations from an independent expert valuer, or valuers, of the loss of value to properties in the vicinity of the proposed development caused by the proposed development? If not, why not?
7. Does your company propose to pay compensation to the owners of properties in the vicinity of the proposed development whose properties are shown by independent expert valuations to have reduced in value as a result of the proposed development?

8. What is the proposed annual fee per turbine proposed to be paid to landowners on whose land the turbines are proposed to be built?
9. Does your company understand that to pay farmers money (effectively compensation) for their acceptance of wind turbines on their land but not to pay neighbouring landowners compensation for the loss of value (proven by independent expert evidence) of their land caused by a nearby wind farm is unfair and a highly contentious and divisive issue?
10. Does your company agree that the Monaro landscape is unique in Australia?
11. Does your company consider that the Monaro landscape will be
 - (a) damaged, and if so, in what way or ways
 - (b) adversely affected, and if so, in what way or ways
 - (c) improved, and if so, in what way or ways,by the proposed development?
12. Does your company agree that the donation of \$4,000.00 by your company to the Nimmitabel Public School prior to any development approval being given may be seen as an attempt by your company to influence local opinion in favour of the development?

Yours faithfully,

Edward Mounsey
Wind Prospect CWP Pty Ltd
PO Box 1708
Newcastle NSW 2300

Dear Mr Mounsey

Thank you for your letter dated 18 September 2008 to Dorothy Carroll, the Chairperson of our organisation regarding the proposed Boco Rock Wind Farm project.

The Ngunawal Heritage Aboriginal Corporation would like to express an interest in this project and participate in the consultation process.

As mentioned in your letter, we would appreciate it if you could send us a copy of the public opinion survey. We look forward to receiving further information about the project and the opportunity to attend the community open day. Please provide us with further details on this event.

In your letter you asked for advice on which aboriginal groups and professionals we recommend be consulted. We have worked with numerous archaeologists in the past for this type of work and we particularly recommend the following:

Wilfred Shawcross
Freelance Consultant Archaeologist
25 Fairfax Street
O'CONNOR ACT 2602
Ph/Fx: 02 6248 7336

Charles Dearling
Charles Dearling Archaeological and Cultural Heritage Consultants

Email: mrussell@umwelt.com.au

The aboriginal groups you have already consulted with (those that you have already written to) appear to give a good representation of the Ngunawal people and another indigenous groups in the area.

Thank you for contacting us. We look forward to working with you on this project. We hope that we can work together to conduct the Aboriginal Heritage Assessment in accordance with the Guidelines.

Kind regards

A handwritten signature in cursive script, which appears to read 'Melinda Tubolec'.

Subject: Boco Rock

Hi Ed,

My Name is John Dixon and I am the Director of Yukembruk Merung Ngarigo Consultancy PTY LTD who represent the Ngarigo Elders of the Monaro. The Monaro is the Traditional lands of the Ngarigo people and I am a direct descendant from "Old Mundy" who was the last Head Man of the Ngarigo Tribes of the Monaro.(Circ 1830)

I have spoken with you prior to xmas on the phone and I did send you an email which was similar to this one.

We have a big interst in the preservation and protection of our culture and heritage and the development of our lands and waters and wish to be consulted in relation to any issues effecting our interests as stake holders.

As discussed with you over the phone prior to xmas we have expressed our interest and will be very happy to work in a positive way to assist your company through identifying sites and any protection necessary for any Aboriginal sites or places that may be impacted during expected disturbances. As you are aware our old people left sites that are protected by state and federal laws. There are permit processes in place that are governed by the state agency DECC who rely on the Aboriginal stake holders to direct the protection and preservation process by working in close partnership with developers to minimise or approve impacts.

We request that you include our company on the list to be consulted for any works you inmtend to do on our lands on the Monaro and that you work with us to preserve and protect our sites.

Thank You,

John Dixon

ATTENTION: EDWARD MOUNEY

24th August 2009

Dear Sir

**RE: THE PROPOSED BOCO ROCK WIND FARM DEVELOPMENT AND
EXPLORATION LICENCES 7291, 7292, 7293, 7294 & 7295**

I refer to your letter dated 24th August 2009, regarding the proposed Boco Rock Wind Farm Development on the Monaro, near Cooma, and your request for feedback on any issues that may impact on, or be of concern to, Volcan Australia Corporation Pty Ltd's current exploration and mining tenements in the area.

Volcan Australia Corporation Pty Ltd is the current title holder of exploration licences 7291, 7292, 7293, 7294 & 7295, within which wind turbines are proposed to be built along ridge lines to the west of Maclaughlin, and approximately 10km south-west of Nimmitabel.

The locations of the proposed wind turbines do not appear to adversely impact these licences. Therefore, Volcan Australia Corporation Pty Ltd has no objections to the proposed Boco Rock Wind Farm.

Nevertheless, Volcan Australia Corporation Pty Ltd reserves any and all exploration and mining rights that it has in respect of the area covered by exploration licences 7291, 7292, 7293, 7294 & 7295.

Yours faithfully

Dear Ed

Wind Farm Development and Exploration Licence – EL 7386

Further to your email of 25 August 2009 and our subsequent brief telephone chat re the above.

At this stage Geogen Victoria does not perceive of any potential impacts or conflict between our exploration activities in EL 7386 (formerly ELA 3631) granted on 18 August 2009 and your wind farm developments in the Cooma area.

We appreciate your ongoing communication with us and will advise if there is any likelihood of a change to this perception in the future.

Yours sincerely

September 2008

Public Opinion Survey

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is useful to us in making sure we have thoroughly identified local community concerns. We feed this information back into the project and thereby allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km ☒

5 - 15km ☐

Over 15km ☐

Do you approve of wind being used to generate renewable electricity?

Yes ☒

No ☐

No view ☐

On hearing of our proposal, what was your initial view?

I support it ☒

I don't support it ☐

Undecided ☐

What do you see as the main benefits of the proposed project?

Relatively isolated site

What would be your main concerns about the proposed project?

That construction will occur - not just land banking

Do you have any other comments, suggestions?

Possible inclusion of part of our property in wind farm

How close do you live to the proposed wind farm?

0 - 5km ☐5 - 15km ☐Over 15km ☒

Do you approve of wind being used to generate renewable electricity?

Yes ☐No ☐No view ☐ NOT SURE

YET *

On hearing of our proposal, what was your initial view?

I support it ☐I don't support it ☐Undecided ☒

What do you see as the main benefits of the proposed project?

I'M NOT SURE OF ANY POTENTIAL BENEFITS, OTHER THAN THE
COMPANY'S POTENTIAL EARNINGS.

What would be your main concerns about the proposed project?

THE SHEEP SCALE OF MATERIALS NEEDED FOR THESE TURBINES
GAINS 1 TON DETRIMENT THE PURPOSE OF TRYING TO MINIMIZE
DEPLETION OF NATURAL ~~RESOURCES~~ RESOURCES FROM THIS PRECIOUS
LAND.

Do you have any other comments, suggestions?

THE ENERGY TO CONSTRUCT & MAKE THE TURBINES MUST SLIPPLY
OUT-WEIGHT THE 'ENERGY' THEY PLAN TO MAKE, CONSIDERING
THEY ONLY LAST STRUCTURELY 20 SHORT YEARS!

* SEA TIDE WAVE ENERGY IS A BETTER OPTION TO CREATE ENERGY.

Your comments help shape the project and allow for the best possible wind farm proposal to be submitted.

RECEIVED
19 MAR 2009

How close do you live to the proposed wind farm?

0 - 5km ☐

5 - 15km ☒

Over 15km ☐

Which attributes of the landscape surrounding the proposed wind farm do you value most? Please list any you can think of.

all of it.

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

yes. Picnics, family outings, friends from Sydney come over landscape.

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

yes - all of them. Especially the magnificent well known scenic drive of Springfield road.

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

The Peak

Springfield road

my garden which will now be spoilt by the blades of the turbines

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

yes - it is generations of my husband's family history that will now be changed forever

Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? Please list any you can think of.

No

Boco Rock Wind Farm

February 2009

Public Opinion Survey—Landscape Values cont'd

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

yes.

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

Completely negative. Everyone involved in hosting these turbines will regret it in 5 years or less.

Do you have any other comments or suggestions?

Please consider not building this windfarm on our beautiful Monaro.

Boco Rock Wind Farm

February 2009

Public Opinion Survey—Landscape Values

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is important to us in making sure we have thoroughly identified local community issues. Your comments help shape the project and allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km ☐

5 - 15km ☒

Over 15km ☐

Which attributes of the landscape surrounding the proposed wind farm do you value most? Please list any you can think of.

Unique - typical Monaro - unaffected by any development!
Our heritage and a landscape that supports me as a local through
times of drought and low commodity prices

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

No not for recreational activities

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

Yes. I travel to and work on my property Kanawier. The
memorable view for me is the spectacular view from my property
at a point on the Cunningham Road 2 kms from the intersection
with the Daley - Andes Road.

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? Please list any you can think of.

No. I have owned [redacted] since 1974. The landscape
has not changed over the past 35 years.

Boco Rock Wind Farm

February 2009

Public Opinion Survey—Landscape Values cont'd

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

Yes from [redacted]

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

Negative and I strongly oppose this unique and ancient landscape to be spoiled by wind towers

Do you have any other comments or suggestions?

Thank you and your friendly staff for the Open Day at Numbatabel for 26th March

Public Opinion Survey—Landscape Values

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is important to us in making sure we have thoroughly identified local community issues. Your comments help shape the project and allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km ☐

5 - 15km ☒

Over 15km ☐

Which attributes of the landscape surrounding the proposed wind farm do you value most? Please list any you can think of.

The memories I have of times I've been around some of these areas for us all to travel over that way a lot for a while there through the 1970's.

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

I have walked on many occasions from the cool hedges of the Shearing sheds on both "Spring field" and "old Spring field" and across to Avar lake and up to the Tea pot Trig. Site.

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

I have been driving cattle with my children and husband many times along the Ando Drive / STEPHENSON ROAD to the T318 on the road to Avar lake site - McCloghlin river.

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

The Tea pot Trig. Site. Up the hill from the corner at the Dineville Dalgrehy Avar Lake road and near Bongardry turn off.

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

Yeah. It was very interesting that in the gullies up the back of the cool hedges there are sort of "plateaus" with lots of different shells. There liked there must have been water there. Dry lakes and lots of stone walls and good the shepherds. Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? built.

Please list any you can think of.

It's got just so very dry.

February 2009

Public Opinion Survey—Landscape Values cont'd

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

No

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

Naturally it wouldn't be the same for me. I have been recently to Albany in Western Australia and was really impressed with the wind farm there.

Do you have any other comments or suggestions?

There are 9 windmills there and they are putting in 12 more. 12.7 is really a lot. I can see why you would need that area. We need power. Such a pity. Wind is a viable option. I didn't think it looked so bad. in ALBANY W.A. As long as locals can benefit from the power why not.

WIND
PROSPECT

Boco Rock Wind Farm

February 2009

Public Opinion Survey—Landscape Values

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is important to us in making sure we have thoroughly identified local community issues. Your comments help shape the project and allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km ☐

5 - 15km ☐

Over 15km ☒

Which attributes of the landscape surrounding the proposed wind farm do you value most? Please list any you can think of.

This landscape is unique & virtually untouched (i.e. has not changed since before white settlement) landscapes such as these have become more & more rare. It is a natural, beautiful landscape in every direction.

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

Fishing on the McLaughlan River. Picnics with friends. Often drive through - every time I marvel at the beauty of this magnificent landscape.

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

Fabulous view from the top of the hill heading down towards the McLaughlan from Bumbuck (heading away from the mountains on the road to) Gungahlin. You have the landscape & panoramas are breathtaking.

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

Top of the hill as above

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

The fact that the landscape is virtually unchanged & there is very little evidence of mankind apart from fences & mounds.

Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? Please list any you can think of.

The landscape has not changed for virtually hundreds / thousands of years.

WIND
PROSPECT

Boco Rock Wind Farm

February 2009

Public Opinion Survey—Landscape Values cont'd

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

This process has caused considerable bad feeling between neighbours - as has been well-documented by other media. Future developments, but wind companies continue to "keep secret" their plans until a proposal is announced. Confidentiality agreements whereby leaseholders are not able to discuss the proposal with their neighbours are a recipe for bad feeling.

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

NEGATIVE - This landscape is magnificent & should be preserved as it is.

Do you have any other comments or suggestions?

This wind farm will turn a pristine natural area that has never been cleared into an industrial landscape. It will alter the landscape forever.

How can you hope to "mitigate" the effect of 30 ^{storey} ~~storey~~ high structures x 127 on the landscape?

If you would like to be kept up-to-date and receive further information about the Boco Rock Wind Farm, please let us know below.

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is important to us in making sure we have thoroughly identified local community issues. Your comments help shape the project and allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

23 MAR 2009

0 - 5km ☐

5 - 15km ☒

Over 15km ☐

Which attributes of the landscape surrounding the proposed wind farm do you value most? Please list any you can think of.

The expanse, the unspoilt nature, the connection
the landscape provides to the coast, the views to
the horizon, the quietness.

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

Yes - most of our holiday surrounds the wind development
A lot of our recreational activities together, tennis,
shooting, fishing take place on our farm.

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

Yes. Yes.

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

~~Not applicable~~

Our holiday - almost anywhere.

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

The [redacted] family have been here for three generations
our children have grown-up here. The last twenty years
of personal memory are closely attached to the
monaro landscape.

Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? Please list any you can think of.

NO.

Boco Rock Wind Farm

February 2009

Public Opinion Survey—Landscape Values cont'd

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

Yes, we live at "██████████" ^{development} the wind ~~farm~~ completely dominates the landscape to the north of our property. Annually we will see between 20 and 40 turbines from our house (all to landscape consultant).

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

NEGATIVE

Do you have any other comments or suggestions?

The Monaro is a beautiful landscape, basically unchanged since settlement. It is otherwise naturally never not cleared. We love living in the country without the imposition of industry and would see the turbine development an enormous imposition on the amenity of our property and have serious concerns about the impact on the viability of the property.

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is important to us in making sure we have thoroughly identified local community issues. Your comments help shape the project and allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km

5 - 15km

Over 15km

Which attributes of the landscape surrounding the proposed wind farm do you value most? Please list any you can think of.

Distant Panoramic Views (Vista- Vision)
rolling hills, Almost no people & few buildings

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

hunting swimming fishing riding

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

Yes wonderful view across Monaro plains to
Snowy Mts.

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

Go to where the Tower will be sited
& see Snowy Mts & right to Victoria (Delegat Mt)

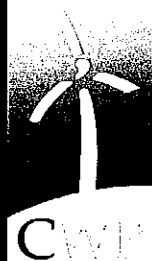

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

The old stone walls built by Chenier Labourer
after the Gold rush.

Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? Please list any you can think of.

Country has been "overgrazed" due to financial pressure on
farmers & drought. Income for landholder from Boco Rock
wind farm will ease financial pressure & allow better
preservation of the environment by farmers.

February 2009

Public Opinion Survey—Landscape Values cont'd

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

Yes. [REDACTED]

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

positive for preserving native biodiversity
neutral for visibility

Do you have any other comments or suggestions?

Dr. Prof David Suzuki said:
"If one day I look out from my cabin porch & see a row of windmills, I will praise them. It will mean we are finally getting somewhere." (New Scientist).

How close do you live to the proposed wind farm?

0 - 5km ☐5 - 15km ☐BY: ----- Over 15km ☒

Which attributes of the landscape surrounding the proposed wind farm do you value most? Please list any you can think of.

AGRICULTURAL LANDSCAPE - OPENESS OF AREA. UNSPOILT
VIEWS AND AMAZING COLOURS OF GRASSLANDS
MINIMAL HUMAN DISTURBANCE.

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

NO. BUT WHEN I DO VISIT THE AREA I ENJOY THE
UNSPILT VISTAS AND REMOTENESS.

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

NO. REGARDLESS OF FREQUENCY I ENJOY THE
UNSPILT LANDSCAPE AND LACK OF HUMAN MADE
STRUCTURES ESPECIALLY ONES OVER 100m TALL

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

THE PEAK. THE TOP OF THE BROTHERS
AND ANY OTHER ELEVATED LOCATION ON THE
MONARO PLAIN.

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

ALL OF THE HILLS VALLEYS PLAINS AND
PADDOCKS THAT ARE AT THE MOMENT
PRISTINE AND WILD AND NOT INDUSTRIALIZED

Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? Please list any you can think of.

DRYOUT HAS SHORT TERM EFFECTS. HISTORICALLY NOTHING
HAS CHANGED PHYSICALLY OF ANY GREAT MEASURE.
HOWEVER 100m TURBINES WILL CHANGE THE
LANDSCAPE SURROUNDING.

Boco Rock Wind Farm

February 2009

Public Opinion Survey—Landscape Values cont'd

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

No. BUT I FEEL SHOCKED, SHADENED, DEPRESSED AND ANGRY THAT THERE ARE PEOPLE THAT WILL HAVE TO VIEW THE WINDFARM FROM THEIR HOUSE AND GET NO FINANCIAL COMPENSATION FOR THEIR LOSS OF VIEW AND LANDSCAPE.

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

VERY NEGATIVE. HOW CAN HUGE INDUSTRIAL TYPE WIND TURBINES HAVE ANY OTHER IMPACT THAN NEGATIVE ON SUCH A UNIQUE LANDSCAPE.

Do you have any other comments or suggestions?

I THINK IF WINDFARMS ARE TO BE BUILT THEN THEY SHOULD BE BUILT IN THE OCEAN OR IN AREAS WHERE THEIR EFFECT ON THE COMMUNITY IS MINIMAL.
~~IF I FELT THEY WOULD MAKE ANY DIFFERENCE TO~~

IF THIS WINDFARM PROPOSAL GOES AHEAD IT WILL BE A DISASTER FOR THE MOWARO LANDSCAPE AND COMMUNITY. WHY SHOULD SOME FARMERS WHO HOSE GET \$10000+ PER TURBINE WHILE OTHERS WHO LIVE WITH THE DESTROYED VIEWS ETC GET NOTHING? WIND IS NOT THE SOLUTION

Your comments help shape the project and allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km ☐

5 - 15km ☒

Over 15km ☐

Which attributes of the landscape surrounding the proposed wind farm do you value most? Please list any you can think of.

Views to the North, West and South

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

Social visits and for access to the South Coast

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

I often use the roads between Myalla & Mininabel, Bonulula, Mininabel, Dalgat.
There are many memorable views along these roads.

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

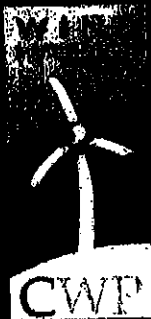

A leading feature of the topography of Monaro is the Great Dividing Range, from the Snowy Mountains and the Coastal Ranges. Outstanding long distance panoramic views are a constantly recurring experience when travelling through this region.

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

The hills known as The Brothers. The ephemeral lakes abundant in above average rainfall years.
See also comments below.

Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? Please list any you can think of.

No. Because the land is used for grazing or has not been farmed, has large areas of naturally treeless grasslands still dominated by natural grassland species. Monaro retains to-day to a large extent conditions prevailing before European settlement. These conditions are rare in occupied country world wide and becoming more so over time. Such areas should be conserved and development prevented. If conservation is not seen to be done it won't be.

Boco Rock Wind Farm

February 2009

Public Opinion Survey—Landscape Values cont'd

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

Yes

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

Negative

Do you have any other comments or suggestions?

Due to variability & unpredictability of wind events and the extreme distances within the distribution network I believe the net emission value of wind generation is limited in Australia. It is a big country therefore we have choice in siting wind farms. They should be placed where they do least harm to other environmental values and the level of local objection is low or non-existent. Two examples of the latter are Ceresat Vic. and the N.W. Coast of Tasmania.

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

We use the Springfield Road and other local roads regularly.

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

as in question one

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

Major towns take photos of our beautiful landscape.

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

The landscape as a whole

Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? Please list any you can think of.

No - just the seasons. Autumn, winter, spring, summer.

Boco Rock Wind Farm

February 2009

Public Opinion Survey—Landscape Values cont'd

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

not from our home, been yes
from the property - [redacted]

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

absolutely negative.

Do you have any other comments or suggestions?

date Mar 2009
update also.

February 2009

Public Opinion Survey—Landscape Values

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is important to us in making sure we have thoroughly identified local community issues. Your comments help shape the project and allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0-5km ☐5-15km ☐Over 15km ☒

Which attributes of the landscape surrounding the proposed wind farm do you value most? Please list any you can think of.

UNSPOILT NATURAL LANDSCAPE. VERY LITTLE
EVIDENCE OF HUMAN ACTIVITY ON A MACRO LEVEL
UNSPOILT LANDSCAPES ARE BECOMING INCREASINGLY RARE
WORLD WIDE

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

IS IT NECESSARY TO VISIT THE GREAT BARRIER REEF TO
BELIEVE IT SHOULD BE PRESERVED?

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

SO, IF I DON'T VISIT SEVERAL TIMES A WEEK THE LANDSCAPE
IS UNIMPORTANT? THIS IS A STUNNINGLY BEAUTIFUL
PART OF NSW STILL VERY MUCH IN ITS ORIGINAL
LANDSCAPE CONDITION PRIOR TO WHITE SETTLEMENT

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

BOTH THE IMMUTABLE SPRINGFIELD ROAD &
THE DALGETY - BOMBALL RD FROM MANY POINTS

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? Please list any you can think of.

ON A MACRO LEVEL (WHICH IS WHAT LANDSCAPE IS
AFTER ALL) VERY LITTLE, IN THE PAST 150 YEARS.
ON A MICRO LEVEL (NOT LANDSCAPE) SOME CHANGES
TO PASTURE COMPOSITION & CONSTRUCTION OF ROADS ETC.
ERECTION OF WIND TURBINES CHANGE THE ^{OVERRIDING} THEME
OF THIS LANDSCAPE DRAMATICALLY FROM NATURAL
TO MAN MADE

Boco Rock Wind Farm

February 2009

Public Opinion Survey—Landscape Values cont'd

19 MAR 2009

BY: _____

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

LOCAL COUNCILS HAVE VERY STRICT REGULATIONS RE BUILDING IN RURAL AREAS BECAUSE LARGE MAN MADE STRUCTURES HAVE A NEGATIVE EFFECT ON NATURAL LANDSCAPES. THIS IS OBVIOUS & THE ABOVE QUESTION IS THEREFORE RATHER RIDICULOUS

Do you have any other comments or suggestions?

HONESTY FROM WIND COMPANIES & NOT DESIGNING QUESTIONNAIRES LIKE THIS TO GET A DESIRED RESULT WOULD BE A GOOD START. I WOULD FIND THE WHOLE ISSUE MUCH EASIER TO ACCEPT IF I WAS TOLD "YES, WE KNOW WIND TURBINES ARE DEGRADING TO UNSPOILT LANDSCAPES BUT WE BELIEVE WE NEED TO DO THIS" RATHER THAN THE MISLEADING PHOTOGRAPHIC REPRESENTATIONS OF WHAT THEY WILL LOOK LIKE AS EVIDENCED IN AN EARLIER NEWSLETTER FROM YOUR COMPANY & SURVEYS SUCH AS THIS.

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is important to us in making sure we have thoroughly identified local community issues. Your comments help shape the project and allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km ☒ *we own land but don't live there* 5 - 15km ☐ Over 15km ☐

Which attributes of the landscape surrounding the proposed wind farm do you value most? Please list any you can think of.

Crazing

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

No

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

Several times a week. Always admire view west over the Snowy Mountains.

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

Babersdore Lane and Babersdore Road

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

No

Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? Please list any you can think of.

No - aside from seasonal.

February 2009

Public Opinion Survey—Landscape Values cont'd

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

Yes. [REDACTED]

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

Neutral.

Do you have any other comments or suggestions?

Our land is within 1 km of the proposed wind farm. We also have ideal sites for wind turbines and if there was any chance of expansion we would be very interested.

Public Opinion Survey—Landscape Values cont'd

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

No

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

Negative impact - they are not attractive

Do you have any other comments or suggestions?

Provide a tangible positive outcome. The wind farm may be an opportunity to provide an improved communications infrastructure. We are looking for National Cap: had and do not get mobile reception as an example. Use your facilities to improve that.

Public Opinion Survey—Landscape Values

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is important to us in making sure we have thoroughly identified local community issues. Your comments help shape the project and allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km ☐5 - 15km ☐Over 15km ☒

Which attributes of the landscape surrounding the proposed wind farm do you value most? Please list any you can think of.

ALL NATURAL ATTRIBUTES IN THE AREA ARE
OF VALUE TO ME & MY FAMILY.

Do you visit the landscape surrounding the proposed wind farm for recreational activities? Please list.

YES, AND WISH FOR OTHERS TO VISIT &
VIEW THEM AS THEY STAND, NATURAL!

Do you travel along any of the local roads surrounding the proposed wind farm on a regular basis (either daily or several times a week)? Are there any memorable views you experience from these road corridors?

WE TRAVEL MANY LOCAL ROADS REGULARLY
AND DO NOT WISH TO SEE ARTIFICIAL
MAN-MADE MONSTERS!

Where would you go to see a distant or panoramic view from the landscape surrounding the wind farm? Please list any locations you can think of.

TOO NUMEROUS LOCATIONS TO LIST.

Are there any features or landmarks within the landscape surrounding the wind farm that have a specific historic or personal memory for you? Please list any you can think of.

IT IS ALL HISTORIC AND BEAUTIFUL, TOO
FRAGILE TO DESTROY!

Over time, have you noticed any physical changes in the landscape surrounding the proposed wind farm? Please list any you can think of.

MORE TRAILS, TRAFFIC & DISTURBANCE!
NOISY AIRCRAFT OVERHEAD TOO!

Boco Rock Wind Farm

February 2009

Public Opinion Survey—Landscape Values cont'd

5/3/09.

Do you think you will have a view of the wind farm from your house or within your property? If yes, please can you provide the name of your property.

NO, AND DON'T WANT TO.

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

NEGATIVE, WE SHOULD USE SOLAR
WAVE ENERGY INSTEAD!

Do you have any other comments or suggestions?

WAS MOST DISAPPOINTED TO SEE THE NUMBER
AND AREA INCREASED FOR THESE UNNECE-
SSARY MONSTERS. THEIR COST TO CONSTRUCT
ALONE WOULD BE ABSURD. WHAT WOULD
THE COST BE TO REPLACE THESE MONSTERS IF
WE WERE TO EXPERIENCE FIRES LIKE VICTORIA
HAS FEARED?

I live 20 kms North West of Cooma
a high exposed spot, ideal for a
wind farm. I have no objections
to wind farms.
