EASTLAKES SHOPPING CENTRE – MIXED USE DEVELOPMENT MODIFICATION

APPLICATION MP 09_0146 MOD 4

I object to the proposed modifications on two grounds:

1. 69 additional units but no additional car spaces [south side.] Traffic around the existing shopping centre is already heavy at times. The resultant extra traffic will only make vehicle and pedestrian movement even more restrictive.
2. I reside almost under the East-West Flight Path. At times planes seem to almost glide over our home on very low approach. If the tower is increased to 11 storeys above the podium, I cannot see how there will be enough clearance for these planes to land safely.

I have not made any reportable political donations in the previous two years.

Yours sincerely,
