

28 March 2012

**Stakeholder Engagement for Altitude Aspire Preferred Project Report**

CPR Group will conduct a supplementary Stakeholder Engagement Program and a report will be submitted as part of the *Preferred Project Report* (PPR) for the NSW Department of Planning.

Once all consultants' reports for the PPR are available, the scope of work will include:

- Peruse the amended layout and supplementary consultants' reports. Identify the importance of changes that have been made in relation to aspects raised by submitters, and other amendments which will be of interest to resident submitters. These will include amendments made in response to Departmental and Council submissions
- Analyse the submissions, both supportive and opposed, with consideration of previous liaison with submitters. Identify appropriate submitters to be contacted and briefed. These will include members of the previously established Community Advisory Panel (CAP).
- Prepare a list of issues raised together with the proposed Newland response, from the Submissions Report by Darryl Anderson Consulting. This will be used to prepare a short Briefing Paper for consulting submitters. The Briefing Paper will demonstrate that Newland has considered and responded to valid aspects raised by residents and government and non-government submitters.
- For equity it is important to provide a response to all other resident submitters. We propose to prepare and post a short letter outlining the changes that are proposed by Newland in response to submissions received.
- The Supplementary Stakeholder Engagement Report will demonstrate that Newland has implemented an effective stakeholder engagement program as is required under Part 3A legislation. It will emphasise Newland's commitment to the project, respect for regional and suburb-level values and its sensitivity towards existing residents and other stakeholders.
