

**SUBMISSION BY MUDGEES GOLF CLUB**

**RE: COBBORA COAL PROJECT (CCP)**

In its earlier submission the Board of Directors of Mudgees Golf Club agreed to reject the applications to move water (2,311ML) from the Macquarie River to the Cudgegong /Windamere System.

The CCP has displayed erratic behaviour when it comes to advising on future water requirements from the Windamere Dam and Cudgegong system.

Given their latest water requirement update, they require another 900ML. State Water's current resource assessment calculations show that the system will collapse if this amount of water is used day in and day out, this puts the viability of the Mudgees Golf Club at risk. Without water the golf facility would cease to exist.

The Mudgees Golf Club strongly opposes any water licence movements that challenge Drought On Record modelling by State Water.
