Dear Director

Re: M5 Widening Project – Non Inclusion of Noise Walls on M5 Liverpool Georges River Bridge

I am deeply concerned that the residents of the Links estate seem to be singled out as the only residential group along the M5 NOT to warrant noise Barriers.

This is simply not acceptable, these residents are average struggling families who deserve at the very least the same as an empty golf course, or an industrial estate, or heaven forbid residents all along other parts of the M5, all of whom seem to warrant noise walls.

It is also distressing that the submissions we posted/mailed have all but been ignored/lost, this is ingenuous at best and discriminatory at its worst.

We have in all good conscience believed that if we voice valid, clear and undisputable information this error may be addressed, however to date our issues have been ignored.

We thank you for allowing us another opportunity to submit our concerns and trust this time someone will listen to them and understand the need for noise walls along this section of the M5. Many residents have written with all the facts and information, I write beseeching that someone listens to them, that someone actually takes note of their absolute need and rectifies this by providing noise walls along this section of the expansion. The costs should not in this instance be prohibitive, in that money has been found to put walls in other places that don't necessarily affect actual peoples sleeping ability.

We look forward to a positive response in the near future.

Regards

Signe
