Dinuka McKenzie - noise barriers

Subject: noise barriers

we have lived in the links estate in Liverpool for 33 years and over that time the noise from the trains and the traffic has gotten far worse.

IT DOES NOT SEEM FAIR THAT THE LINKS ESTATE WILL BE THE ONLY AREA LEFT WITHOUT NOISE BARRIERS on the whole M5/M7/M4 with no noise walls on a bridge.

this is affecting the value of our home.

Subject: noise barriers

I have been living in the Links Estate for 26 years and have experienced an increasing noise level in our area. we have to deal with the noise from the trains which has worsened with longer freight trains being allowed and have been waiting for noise barriers on the Georges river to lessen the noise from the M5.

Now this seems to not be happening and I wish to understand why?

we are the only area on the whole of the M5/M7/M4 with no noise walls on a bridge and this does not seem fair.

It is apparent that the quality of health and life of Australian Citizens in the Links Estate is of less importance than the cost for the construction of a noise barrier on the bridge.

Yours sincerely
Kathryn Brady
