Attention: Submissions Department,

On behalf of my parents George and Afroula Pserras, who reside at 9 Birkdale Crescent Liverpool, commonly known as the Links Estate, I hereby object to the fact that no noise barriers have been proposed for the bridge portion of the M5 crossing the Georges River. The noise currently generated by the traffic is barely tolerable, let alone the noise that will be generated from the future increase in traffic volumes.

My parents' house is quite high and gets nice summer breezes, they have lived there for 30 years without the need for air conditioning. We needed to live with them for the months of February and March, to assist in their care (Mum is 75 & Dad is 83) and it was quite disturbing to sleep at night, the traffic noise was quite significant and barely tolerable, on the hotter nights with the windows open you felt like you were sitting in the middle of the M5.

We do request that the Consultants working on this project do carefully consider the residents of the Links Estate and consider their amenity, the estate was once known as one of the premier estates in the area, between the battering of the Railway Freight Line and now the widening of the M5, it has slowly resorted to being one of the most downtrodden and neglected estates in the area.

Regards

nuka McKenzie - noise walls

From: "Keith Hendricks" <khen9990@bigpond.net.au>

Subject: noise walls

To whom it may concern,

I Keith Hendricks of 18 Lakewood cres. Casula, would like to express my utter disgust at hearing that no **noise walls on the Georges River Bridge are to be installed due to the number of complaints made by residents.** This is a working Class Area and we are not always up to date with the lodging of complaints about projects in our area, but it dose not mean that we are happy with the **NOISE FROM THE M5.** We are all **TAX PAYERS** and we expect our **ELLECTED OFFICILS TO DO THE RIGHT THING BY US.** So as all the other freeways has **NOISE WALLS WHY** has it been decided that we are different from all the other communities living along freeways? Noise has already increased four fold since the opening of this freeway and if it is going to be made wider it means the **NOISE LEVEL** is going to increase even more, to what

extent we do not know yet. Having said this I hope the decision can, and should be changed and we **GET OUR NOISE WALLS IN LINE WITH ALL THE OTHER FREEWAYS.**

Regards Keith Hendricks.
