Site Title:
Dargues Reef Mine
Job Title:
Modification to Dargues Reef Gold Project (10_0054)
Modification Description:

The proposed modification would permit the use of paste fill to backfill completed stopes within the approved Dargues Reef Gold Mine. All additional surface infrastructure would be constructed within an area of approved disturbance. The use of paste fill would permit extraction of a greater proportion of the identified resource than would otherwise be possible under the approved Project and would result in the final Tailings Storage Facility being smaller than approved.
