This email in is protest of Lake Macquarie City Council with the proposed expansion of Awaba Waste Management Facilities.

I believe the process of taking away my family time to write this email is un-constitutional as I dont get paid for my time, unfortunately this expansion is on high prority for the Awaba community and its assosiation with the outcome of this facility.

Tony Farrell from LMCC has held several meetings with the Awaba community which has outlined the plans of this expansion, explaining the impact that he believes will have on waterways, wildlife, air-pollution, vegetation, quality of life and many other factors for the local community.

LMCC has contracted Cardno to do a impact study on these areas for an undisclosed amount of money to have a draft copy of the councils view which I belive the council may edit before submission to the Department of Planning for a brighter outlook.

From the information I have received there are many of these matters that have been unresolved between the community and the council.

I write to you in request, a committee from the Department of Planning visit our local area and act as a mediator to both parties about this proposal as I disagree with the expansion put forward and its impacts.

I seek to be part of the process to resolve the best solution for both Awaba Community and LMCC.

Confirm this email.
