Dear Sir/Madam,

My comments for the submission relate to the Crown Land that while not directly adjacent to the Expansion site, is adjacent to the Awaba State Forest, and has a significant population of *Tetratheca juncea* (TJ). This land is also apart of councils proposed conservation area. I request that council purchase the Crown Land that is marked ' DP755218' as it important land to build the wildlife corridor from the mountains to the lake. I also request that council purchases other land to be conserved; DP1149082, DP1164232, as they are important to the wildlife corridor. In summary;

1. Council acknowledges the obligation to purchase appropriate land to offset the Expansion Project.
2. While not directly adjacent to the site, Crown land DP755218 (and/or DP1149082, DP1164232) is the appropriate choice because:
 - * it is apart of the original Awaba Conservation Area proposed by Council;
 - * it is a part of the wildlife corridor from the mountains to the Lake, (adjacent to Awaba State Forest and Sugarloaf Conservation Area.)
 - * is of high biodiversity value;
 - * has a significant population of *Tetratheca juncea*.

Regards
