Sydney NSW 2000

Dear James,

**RE: White Rock Wind Farm (MP10\_0160) Turbine Layout**

Please note that the final turbine layout has been modified and is for up to 119 wind turbines and associated infrastructure.

The number of turbines has increased from the 80 – 100 turbines anticipated in the Project Application and Preliminary Environmental Assessment submitted in September 2010, however the overall footprint of the development remains very similar.

Yours sincerely,

**ANDREW WILSON**  
Construction Manager
