**Subject:** St Peters Materials Recycling Facility - submission

---

Hello and thanks for the notice about the recycling facility.

Project application number MP 11\_0086

I object to this proposal on the grounds that crushing what will probably equate to nearly 580 tonnes of sandstone and other demolition waste each business day will create continual noise and heavy dust, and that the facility exists too close to residential areas for this noise and dust to be acceptable.

In addition, the large trucks required to deliver this material will be required to travel along residential streets to do so, adding to noise and traffic congestion.

I feel that the recycling facility proposed will be detrimental to the quiet enjoyment of my home, and may also have an impact on the health of my family. I would also suggest that an area such as St Peters which is becoming increasingly residential is not the appropriate place for a facility of this kind.

Thank you for your attention to this submission.

Yours sincerely,

**Sabrina Antoniou**
