Dear Mr Fittell

RE: Mount Owen Continued Operation Project - Modification 6 - Realignment of Narama Pipeline - Modification Report - SSD-5850

Thank you for your referral dated 18 November 2020 inviting comments from the Heritage Council of NSW on the above State Significant Development (SSD) proposal.

The proposed development involves:

- upgrade and realign the Narama Pipeline between Mount Owen and Ravensworth;
- upgrade existing access roads and establish laydown areas to facilitate construction of the realigned pipeline; and
- install a new pumping station at the Mount Owen Complex.

The following report was considered in our assessment: *Mount Owen Continued Operations Project Modification 6, Modification Report Final*, prepared by Umwelt Environmental & Social Consultants, dated 13 November 2020;

As delegate of the Heritage Council of NSW, we note modification 6 will not impact on heritage in the proposed works area shown in the report listed above. It is also noted that there is no historical archaeological impact as a result of the modification, and the current management methods provided in the HHMP for the project are sufficient to manage unexpected historical archaeological information.

Unless the heritage impacts of this project change, Heritage NSW does not need to be consulted about this project again.

If you have any questions about this correspondence, please contact please contact Tim Olliver, Senior Heritage Assessment Officer, at Heritage NSW, on (02) 4927 3203 or Timothy.Olliver@environment.nsw.gov.au.

Yours sincerely

Katrina Stankowski
Senior Team Leader, Regional Heritage Assessments North
Heritage NSW, Department of Premier and Cabinet
As Delegate of the Heritage Council of NSW
