Modification to Angus Place Coal Mine (MP06_0021) and Springvale Water Treatment Facility (SSD-7592)

Dear Mr Rode

I refer to the Department's correspondence dated 3 December 2020 seeking WaterNSW's comments on the Modification Report for the Angus Place Coal Mine and Springvale Water Treatment Facility. WaterNSW appreciates the opportunity to provide comments on the Project.

WaterNSW has reviewed the Modification Report and considers it does not adversely impact water quality as long as the proposed controls are implemented and it would have a Neutral or Beneficial Effect (NorBE) on water quality if Springvale Water Treatment Facility (SWTF) operates in a stable condition.

WaterNSW requests the following documents be prepared or updated in consultation with WaterNSW:

- Angus Place Mine's Water Management Plan including Water Softening Plant's operational management, particularly, sulphuric acid storage and handling
- SWTF's Water Management Plan including Pond D, and
- Construction stage soil and water management plan for the new pipeline construction.

WaterNSW requests to remain as a stakeholder and opportunity to continue to be involved in further assessment of the proposal.

If you wish to discuss further, please contact Juri Jung on 9865 2503 or email at environmental.assessments@watarnsw.com.au.

Yours sincerely
