Dear Mr Schwebel

**Review of Response to Submissions (RtS) Report- SSD-10474
St Marys Resource Recovery Facility, 25 Dunheved Circuit, St Marys**

I refer to the request by the Department of Planning, Industry and Environment (DPIE) for the NSW Environment Protection Authority (EPA) to review the Response to Submissions (RtS) by ReDirect Recycling Pty Ltd (the Applicant) for a Resource Recovery Facility at 25 Dunheved Circuit St Marys (SSD-10474).

The EPA has reviewed the RtS and notes that the Applicant has been silent on our submission of 6 April 2021 on the Environmental Impact Assessment (our reference DOC21/162757-5). The EPA interprets this as the Applicant having no comments to our submission and that they accept the associated conditions if development consent were to be granted.

The EPA recommended conditions for this proposal remain unchanged from our 6 April correspondence (as listed in Attachment A).

If development approval is granted, the Applicant will require an Environment Protection Licence issued under the Protection of the Environment Operations Act 1997. The Applicant will need to make a separate application to EPA to obtain this licence. Attachment B of our 6 April correspondence contains mandatory conditions for all EPA licences.

Yours Sincerely,

A handwritten signature in blue ink, appearing to read 'Greg Newman', written over a light blue horizontal line.

16/8/2021

Greg Newman
Acting Unit Head
Regulatory Operations Metro South
