ATTN: Shaun Williams

Dear Madam/ Sir,

**Girraween Waste Recycling Transfer Facility (SSD-9766) (Cumberland)
Response to Submissions**

Thank you for your correspondence via the Major Projects Portal (ref: PAE-2752) dated 8 April 2020 requesting Transport for NSW (TfNSW) review and comment on the above. Legislation came into effect on 1 December 2019 that brings together Roads & Maritime Services and TfNSW. This response reflects the advice from the new organisation.

The supporting documentation provided in support of SSD-9766 have been reviewed, and the following suggestions are recommended for consideration.

Construction and Traffic Management

Comment

Several construction projects are likely to occur at the same time as this development. The cumulative increase in construction vehicle movements from these projects could have the potential to impact on general traffic and public transport operations on the surrounding transport network, as well as the safety of pedestrians and cyclists particularly during commuter peak periods.

Recommendation

It is requested that the applicant be conditioned to prepare a detailed Construction and Traffic Management Plan (CTMP) for various stages detailing construction vehicle routes, number of trucks, hours of operation, access arrangements and traffic control. The CTMP should be submitted to the relevant consent authority for approval prior to the issue of a Construction Certificate.

Thank you again for the opportunity to provide feedback on the above development application. Should you require clarification of any issue raised, please don't hesitate to contact Robert Rutledge, Principal Transport Planner, Land Use Planning and Development at Robert.rutledge@transport.nsw.gov.au.

Yours sincerely

30/4/2020

Mark Ozinga

Principal Manager, Land Use Planning & Development
