Dear Carl Dumbleton,

Re: Advice on Environmental Impact Statement (EIS) for Maroota Friable Sandstone Extraction Project (SSD-10410)

Fire and Rescue NSW (FRNSW) acknowledge correspondence received on 23 February 2022, inviting comment and advice on recommended conditions for the Maroota Friable Sandstone Extraction Project (SSD-10410). FRNSW have reviewed the EIS and other submitted documentation and make the following comments:

It is deemed that the proposal has limited scope and application in regard to fire and life safety, and as such FRNSW submit no comments or recommendations for consideration, nor any requirements beyond that specified by applicable legislation.

While there is currently no requirement for a fire safety study, FRNSW may recommend one be undertaken at a later stage should information be provided such it is deemed that the development poses unique challenges to the response to and management of an incident.

For further information please contact the Operational Liaison and Special Hazards Unit, referencing FRNSW file number BFS22/791. Please ensure that all correspondence in relation to this matter is submitted electronically to firesafety@fire.nsw.gov.au.

Yours sincerely,

A handwritten signature in black ink, appearing to read "John Hawes".

Superintendent John Hawes
Manager
Operational Liaison and Special Hazards Unit
