Dear Ms Berzins

RE: Request for advice - Goulburn Base Hospital - MOD 2 Design Refinements

I refer to the Modification 2 Application (MOD 2) for the Goulburn Base Hospital Redevelopment Project (the project), provided to the NSW Environment Protection Authority (EPA) through the Major Projects planning portal on 14 October 2019. The Department of Planning, Industry and Environment (DPIE) is seeking comments on MOD 2 from the EPA.

The EPA has previously provided advice to DPIE that the upgrade works at the facility will not be licensed by the EPA, however given it is a state government project, the EPA will be the appropriate regulatory authority in accordance with the *Protection of the Environment Operations Act 1997* for construction works.

After reviewing the documentation provided with the MOD 2 application, the EPA has no additional comments to make. The EPA recommends that any conditions of approval ensure that construction works meet the appropriate environmental guidelines.

Should you have any queries or wish to discuss this matter, please contact Michael Heinze on 6229 7002.

Yours sincerely
