This is a detailed architectural site plan of the Los Angeles County Jail. The plan shows a large, rectangular building complex with various functional areas. Key features include:

- Building Layout:** The main building is divided into several sections, including the ERGOPAL (Full Case) Buffer, ASRS High Bay, and various rooms such as the MHS Maintenance, SCS Room, and Office. There are also several smaller rooms and corridors throughout the complex.
- Parking and Access:** The plan shows extensive parking areas, including the MHE Parking & Charging lot. Access points are marked with gates and roads, such as the 10th Street and 11th Street access points.
- Infrastructure:** The plan includes details on roads, sidewalks, and various infrastructure elements like the ASRS High Bay, ASRS High Bay, and ASRS High Bay. There are also several smaller rooms and corridors throughout the complex.
- Orientation and Scale:** The plan includes a north arrow and a scale bar. The scale bar indicates distances in feet, ranging from 0 to 1000 feet. The north arrow points towards the top of the page.
- Labels and Annotations:** Numerous labels and annotations are present throughout the plan, providing specific details about the various areas and features. These include room names, room numbers, and various technical specifications.

The plan is a technical drawing, likely created using CAD software, and is intended to provide a comprehensive overview of the Los Angeles County Jail's layout and infrastructure.
