We have assessed the illuminance of the lighting to be included in the art works in Little Hay Street for compliance against AS4282 Control of the Obtrusive effects of Outdoors Lighting. This includes consideration of the potential impacts of the art installation lighting on habitable rooms to apartments in the locality; in particular the apartments located on Darling Harbour Live South East Plot podium façade north elevation & podium façade South in Little Hay Street, which will be located closest to the art installation.

I hereby certify that Little Hay Street City Lights artworks including C1, W1, W2, W3 & 14 artworks below awnings as documented by Brendan Van Hek/Lendlease/Event Engineering do comply with AS4282 Control of the Obtrusive effects of Outdoors Lighting as follows:

- 1) Pre-curfew hours (6am-11pm*): the installation complies at full brightness
- 2) Curfewed hours (11pm - 6am*): the installation does not comply & will need to be turn off

(* Unless otherwise specified by the controlling authority)

Therefore, the installation complies with recommended maximum values as stated on AS4282 as long as the installation is switched off during curfewed hours.
