Attention: Katelyn Symington

Dear Madam,

RE: Request for Additional Information – MP08_0079 Mod 1

This letter is provided in response to the Request for Additional Information (RFI) email dated 9 October 2019 received from Peter Nichols of the Department of Planning, Industry and Environment (DPIE) Biodiversity and Conservation Division (BCD). A copy of the email is provided at Appendix A.

In discussion with Council, the decision was made to revise the intersection design to remove any impact on the referenced vegetation. To achieve this, the proposed batters supporting the intersection have been minimised where possible resulting in no vegetation requiring removal. A revised intersection design is provided in Appendix B.

Through consultation with the BCD, it is understood that the revised intersection design is appropriate. Protective fencing has also been recommended to protect the vegetation during construction works. This fencing will be implemented as part of any future works plan.

We trust this information satisfies the concerns raised within the received correspondence. If you require any further information or clarification, please do not hesitate to contact the undersigned on (02) 4940 0442.

Yours sincerely

Kale Langford
